How to make a favorite theme for yourself?

3D Page Flip Professional is a professional and humanizing software, so you can make a DIY theme for yourself effortlessly. It does not require any professional skills and instructions.

1

Select favorite template

2

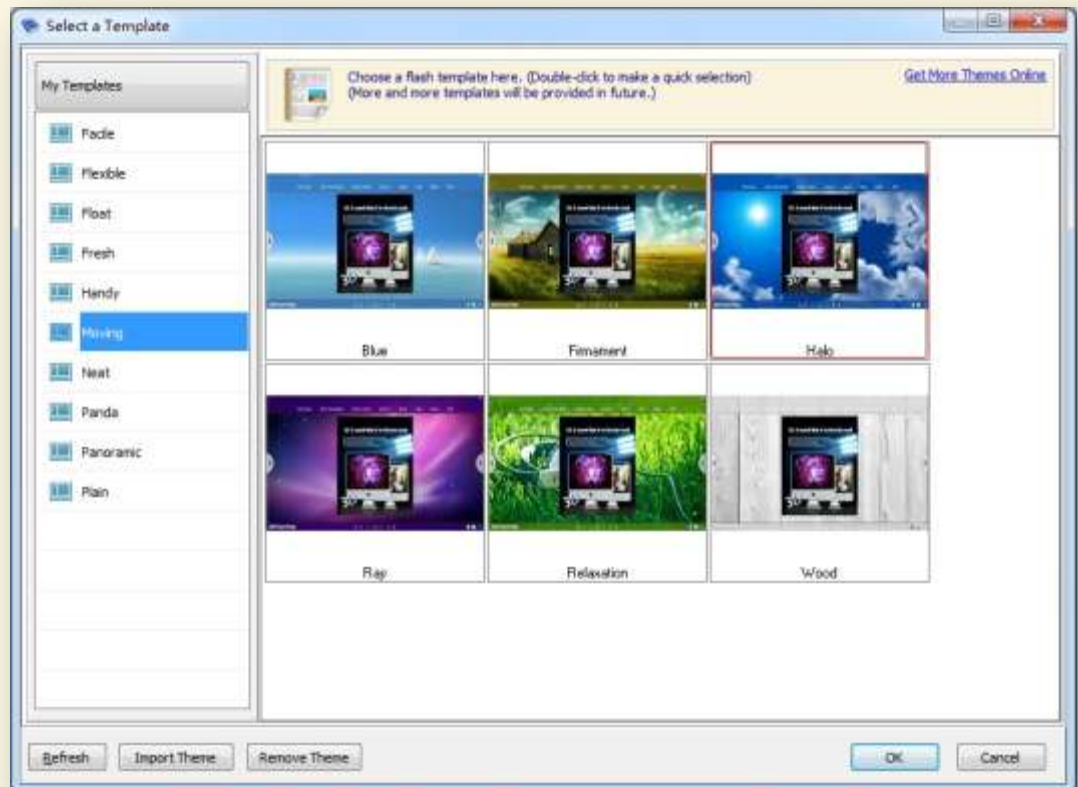

Insert background image

3

Template design settings

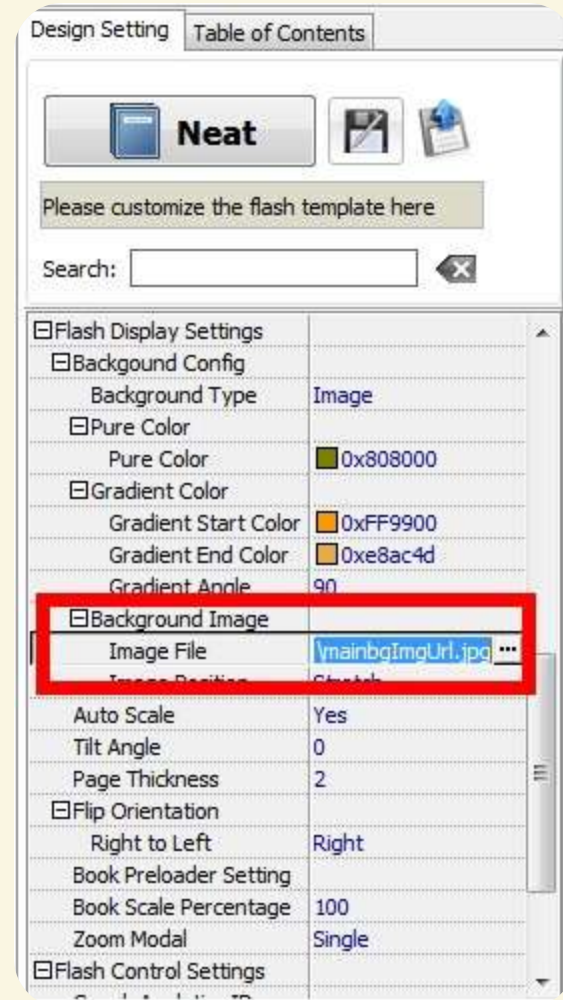

Step 1: select favorite template

First of all, just launch 3D PageFlip Professional and then select your favorite template in the design setting.

Step 2: Insert background image

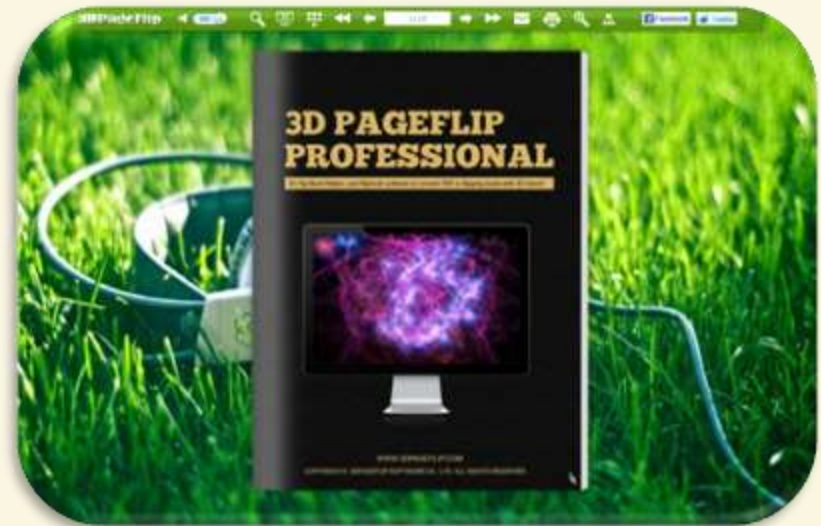

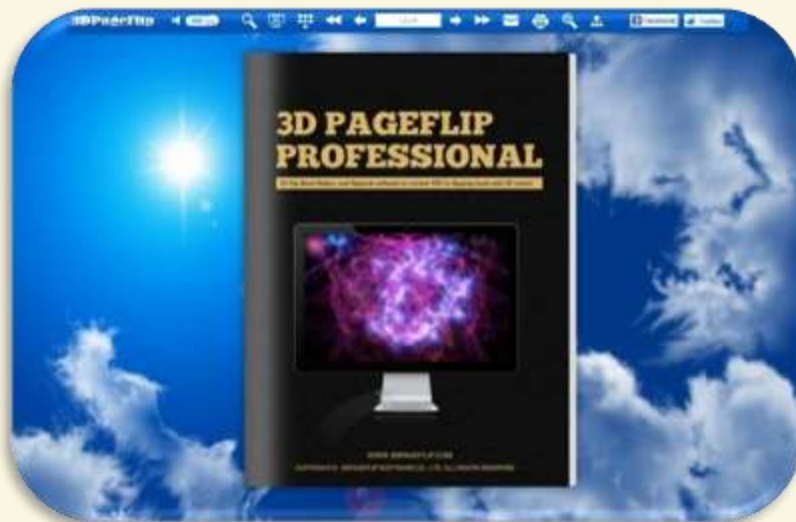

Second, you need to import an image by clicking the “**Image File**”. After you insert an image, you can adjust the background position as well. You need to click the icon of “Apply Change” to finish the setting.

Step 3: template design settings

Third, you can adjust the tool bar color. What's more, you can also modify the color and font of the buttons.

THANK YOU!
