Skinnies SILK products offer freedom for sensitive skin conditions

Seamless design

Each garment is produced individually in one piece using our cutting edge technology, which creates a 360 degree stretch. There is no sewing together and no seams, making Skinnies Silk garments extremely strong, especially in those commonly weak areas such as the armpit and groin. Seamfree Technology™ removes stress points, minimising friction, in addition we know some people use the seams as 'itch points', **this is not possible with Skinnies** making them a wonderfully soft and comfortable garment that is easy to wear.

Breathable

By utilising Skinnies Seamfree Technology™, we have designed our garments to reduce the friction from everyday movement of our bodies, improving temperature regulation, reducing heat and sweating that can make itching worse and further irritate the skin.

Range of sizes and colours

Skinnies are the only silk garments available on prescription to offer a range of different colours. **They don't look 'medical'** so children keep them on, Skinnies Silk garments are more discreet, comfortable and easy to wear.

Skinnies SILK products are more cost effective than competitor products!

Antimicrobial protection

Sanitized® offers freshness, comfort and protection. It is UK allergy approved and the only company globally to be Bluesign approved.

Contains No Silver

Sanitized® T 99-19 destabilizes the cell wall and deactivates the bacteria.

A bit about SILK and its benefits

Silk - the most beautiful of all textile fibres is acclaimed as the queen of textiles and comes from the cocoon of the silk worm.

Silk filament is a double strand of fibroin, which is held together by a gummy substance called sericin, which is removed in medical grade silk such as Skinnies.

Silk is capable of reaching body temperature quickly and then maintaining it at a constant level, this is important as it helps to reduce excessive sweating which is often common in infants, children and even adults affected by eczema.

This feature can protect the skin from moisture loss that can aggravate skin dryness, however it is also highly absorbent and can absorb up to 30% of its weight in moisture without feeling damp, it will absorb perspiration but still let your skin breathe.

Silk is very 'tough', and is the strongest natural fibre - comparable with tensile steel in strength - with a smooth surface that resists soil and odours well, it is also wrinkle and tear resistant, and dries extremely quickly.

Children's range

Style	Size (Age)	Ref code	Style	Size (Age)	Ref code
