

# Leverage Product Research Library. Solve Urgent Sourcing Challenges.

## COVID-19 Supply Chain Resource

GreenLight's Product Research Library, an in-depth device research database, provides health systems with rapid access to sourcing data, clinically-equivalent alternatives, clinical evidence, and vendor compliance data to assess the safety and efficacy of all personally protective equipment, ventilators and respirators.

## About GreenLight

GreenLight Medical provides supply chain expertise, value analysis advisory services and virtual platforms to manage the introduction and management of medical technology for hospital systems. GreenLight is for innovative healthcare organizations who are innovating the traditional supply chain and value analysis functions and partnering with their teams to unleash value-based care.

## Complimentary Access - Spring 2020

### Product Research Library

GreenLight's data, research and engineering teams have built a responsive and relevant repository of COVID19 product data to ensure all stakeholders have the data they need to drive actionable insights and source necessary supplies. The GreenLight Product Research Library includes in-depth data ranging from Class I medical devices and biologics to Class III PMA devices.

### Overview

Leverage the platform to gain insights into product descriptions and indications for use, extensive FDA regulatory data, and clinical evidence. Additionally, access the latest products from personally protective equipment, ventilators, and IV supplies that are in critical shortage. Hospitals can access the latest data about fast-tracked new FDA COVID-19 approvals, recall information and clinically-equivalent alternatives to solve sourcing shortages in critical areas.

### Complimentary Access

Hospitals and health systems will be able to leverage GreenLight's medical device research to accelerate the identification and acquisition of medical devices, product equivalents, clinical evidence and FDA guidelines for COVID-19 products. To participate, health systems must register for access. We believe that by reducing the barriers to accessing critical data, we can ensure that hospitals can leverage the right information at the right time on behalf of patients and providers.

*"GreenLight has been instrumental in the rebranding and relaunching of our Clinical Quality Value Analysis program. The cloud-based software has allowed the opportunity to have one platform to share information across our entire organization, administrators, physicians, clinical staff and supply chain."*
