3D Page Flip eBook

How to create 3D objects or products
with 360 degree view in page flip book?

Nowadays, how to show others your products become important and creative. A normal picture is not enough to show a product, but a 360 degree object will take place of it!

Here 3D eBook Tool will help to do so. It can convert PDF to stunning eBook with flash 3D effect and realistic page turning effect. More and more, it can help you insert 3D objects in the PDF pages. When someone clicks the action, the object will pop-up from the eBook, spinning 360 degree to show to your customer panoramically!

Let's see how to create 3D product!

How to Create 3D Product in eBook?

Step 1

Make sure you have installed 3D PageFlip Professional, import PDF and enter Page Editor.

Step 2

Step 3

You can select an option (link, image, button, bitmap button) to create your 3D object. Let's take image as an example. Click "Add Image" to draw a frame in PDF page. Double click the frame area to import an image.

**Step 4**

Step 5

How to Create 3D Product in eBook?

Move to left side of Page Editor. Click "Set action" in "Properties of Image". Then choose "360 Degree Product Present" in the action types.

Step 3

Step 4

Step 5

**Step 1**

How to Create 3D Product in eBook?

Click "Add Images" to select images of your objects in all aspects. You need to use "Up" and "Down" button to put images in order if they are messy. Start to have a try in the software; you can click to download the original images of 3D objects.

Step 4

Click "Preview" to view the effect in the pop-up window. In this case, you can have a detailed design for the object with 360 degree:

• Speed: type in a number for spinning speed. The larger number you set, the smaller spinning speed you will get.

• Direction: You can make it to spin from right to left or left to right.

• Bottom gradient appear: If you tick this option, the bottom of your object will be gradient. It's a good way to optimize its bottom edge and make it more realistic.

• Edge blur: an option to make the edge gentler and beautify the output 3D object.
