

Boston-Area Energy Thought Leaders Partner to Hold Inaugural New Energy Solutions Conference - 2019

Conference is bringing together leaders in energy storage, microgrids, and transportation infrastructure to chart the future of New Energy

For Immediate Release

Boston, Massachusetts (June 10, 2019) The Institute for Innovation and Sustainability in collaboration with the Northeast Electrochemical Energy Storage Cluster, ACTION and the Hydrogen Energy Center is pleased to host the 2019 New Energy Solutions Conference, focused on Energy Storage, Microgrids and Transportation Infrastructure, taking place at the Boston Marriott Newton on Thursday, June 27, 2019. This unique conference is bringing together leaders in energy storage, microgrids, and transportation infrastructure to the energy innovation epicenter: Boston, Massachusetts.

“Expanding renewable energy and electrification of transportation are critical for achieving carbon emission targets. These changes are also creating massive new business opportunities in energy storage, microgrids and transportation infrastructure. We are happy to organize this unique conference to facilitate new partnerships, investments and policies to accelerate this transition.” *Brad Bradshaw, Conference Chair*

The conference builds on the 2017 Energy Storage and Microgrids Conference, held in 2017, with 200 participants. The latest event is a more focused solutions driven conference for industry participants in the Northeast who want to participate in these fast-moving markets and apply these technologies and solutions to reduce costs and emissions.

The New Energy Solutions Conference has assembled a top flight slate of 25 speakers on 11 panels, sharing insights on their business successes. Conference speakers include:

- Kelly Speakes-Backman, CEO, Energy Storage Association
- Charlotte Ancel, Director of Strategic Development, Eversource Energy
- Andy Haun, CTO Microgrids, Schneider Electric
- Edmund Young, Hydrogen Fuel Infrastructure Development, Toyota Motors North America
- Phillip Martin, Business Development, EnelX
- Roy Bant, Business Development, Air Liquide
- Benjamin Bollinger, Vice President, Malta Energy

Conference panels and topics include:

- Residential Energy Storage for Backup Power & Peak Load Reduction;
- Microgrids & DER Networks for Cost Reduction & Revenue Generation;
- Commercial & Industrial Behind-the-Meter Energy Storage Strategies;
- Software Strategies for High Performance System Operation;
- Long Term Energy Storage with Hydrogen & Flow Batteries;

- Utility & Grid Scale Energy Storage Strategies;
- Hydrogen Transportation Infrastructure;
- Innovative Next Generation Energy Storage Technologies & Solutions;
- Electric Vehicle Transportation Infrastructure;
- Solar Plus Storage: Customer Value Propositions for Integrated Solutions; and
- Blockchain in Energy: Early Market Traction & Business Implications.

About NESC 2019

The 2019 New Energy Solutions Conference is bringing together leaders in the energy storage, microgrids, and transportation infrastructure to the new energy innovation epicenter: Boston, Massachusetts. The conference builds on the 2017 Energy Storage and Microgrids Conference, held September 11, 2017, with 200 participants and 25 speakers. This is a focused solutions driven conference for industry participants in the Northeast who want to participate in these fast moving markets and apply these technologies and solutions to reduce costs and emissions.

The Institute for Innovation and Sustainability

The Institute for Innovation and Sustainability is focused on improving the lives and well-being of people around the world through enhanced innovation and sustainability. The Institute is dedicated to accelerating a clean energy future, increasing environmental, economic and social equity, improving the health and well-being of people globally by facilitating knowledge and innovation through research, publications, facilitation and conferences.
