

## FULLY INTERACTIVE LIVE ENVIRONMENT

CYRIN improves upon traditional cyber range systems by providing an independent and fully interactive live exercise environment for each student, plus comprehensive real-time monitoring of student progress against learning objectives within practical exercises. CYRIN is effective e-learning that saves time and money.

Visit <https://cyrin.atcorp.com/utilities>  
And see our whole range of Virtual Labs!

## NEXT GENERATION CYBER RANGE PLATFORM

CYRIN™ is a next-generation cyber range platform featuring real tools, real attacks, and real scenarios that provide the hands-on training and experience cyber defenders need to identify and neutralize threats from anywhere in the world – including those to our critical energy infrastructure.

# THE POWER TO PROTECT

Cyber Range Training  
for Maximum Grid Security

*The online, always on, always available  
Cyber Range Training Platform*

# CYBER SECURITY OFFERINGS FOR UTILITY OPERATING & TRANSMISSION COMPANIES

## CYRIN ENTERPRISE CYBERSECURITY LABS

A growing catalog of cyber defense training labs in these critical areas:

-  Secure Network Setup
-  Secure System Setup
-  Network Monitoring & Recon
-  Vulnerability Scanning
-  Secure Web Application Setup
-  Web Application Security Analysis
-  Incident Response
-  Cyber Forensics

*ATCorp will publish at least one new cybersecurity lab per quarter.*

## WAR GAMING

Test your team's abilities with virtual capture-the-flag, defacement, and denial of service scenarios. Let your team unleash their tools and knowledge to destroy targets of varying difficulty and threat level, or have them compete head-to-head in attack/defend war games.

CYRIN provides scenarios for both enterprise and representative control systems networks.

*ATCorp will publish at least one new war game per quarter.*

## A UTILITY UNDER ATTACK

Sign on to a virtual network representing a power generation, transmission, and/or distribution company. Each utility gets a dedicated virtual network that includes representative enterprise and operational systems, such as SCADA servers, PLCs, and engineering workstations. CYRIN launches cyberattacks within this virtual system, including internet-originating attacks like spear-phishing, insider threats, and supply chain compromises. Normal background traffic adds to scenario realism.

ATCorp will publish at least one new attack scenario on this network per quarter. Users can sign on via a web browser or can "bring their own tools" with a VPN connection to the exercise network.

CYRIN utility networks and attacks can be customized to match your environment for an enhanced training experience. Talk to us for pricing.

*Use CYRIN as part of your GridEx V event experience, as well as before and after to keep your team's skills sharp!*

Which CYRIN subscription level is right for your organization?

	LEVEL 1	LEVEL 2	LEVEL 3
<b>CYRIN Enterprise Cybersecurity Labs</b>			
<b>War Gaming</b>			
<b>A Utility Under Attack</b>			
<b>ANNUAL SUBSCRIPTION PRICE*</b>	<b>\$1,995</b>	<b>\$3,995</b>	<b>\$5,995</b>

\*Annual subscription pricing is listed on a per user basis. Discounts are available for multiple user subscriptions and on an enterprise-wide basis.
