LIO LISTEN-IN-ONLY

NEW

DRIVE-THRU LISTEN IN ONLY AUDIO SYSTEM

LIO is the new, revolutionary alternative audio system designed to listen to the drive-thru activity without pricey, traditional, two-way headsets. LIO is compatible with all major drive-thru systems and can be used with any 3.5mm headphones or earbuds. Delivering high-definition sound quality within 300 yards, LIO improves order accuracy, team communications and customer satisfaction. This economical drive-thru solution is built for all QSR businesses.

FEATURES & BENEFITS:

Cost Savings

LIO's listen in only technology keeps drive-thru operation costs low by replacing unnecessary and expensive 2-way headsets. With a standard 3.5mm audio jack, LIO can be paired with affordable wired headphones or earbuds.

Quality Communication

High-definition sound quality improves order accuracy and eliminates the need for noisy grill speakers. With a range of up to 300 yards, managers can monitor the drive-thru and staff anywhere within and outside of the restaurant.

Customer Satisfaction

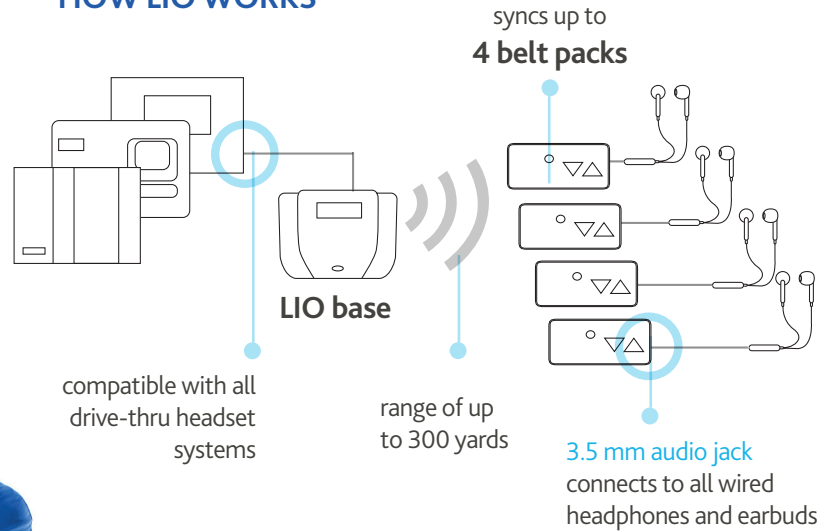

With more staff listening in to the drive-thru, employees hear orders in real time improving overall customer satisfaction.

Easy Installation

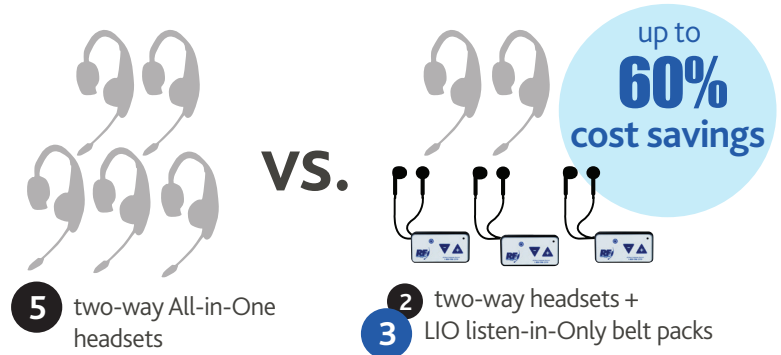

Compatible with all drive-thru headset systems and is easy to setup and install. No technician needed.

HOW LIO WORKS

COST ADVANTAGE
