

# WEBB-RITE SAFETY INC.

Fall Protection Specialists Since 1999

## New - Innovative - Portable FALL PROTECTION SYSTEM

### Safety Lifeline System

The Safety Lifeline System is a new and innovative fall protection solution for residential, commercial, and industrial projects. It is one of the most advanced fall protection solutions on the market today that can increase worker safety, mobility, and productivity. The system is constructed with steel and aluminum for strength, durability, and portability for simple installation and relocation on jobsite. The tie-off point is positioned above the worker eliminating the need for anchor plates, ropes, and straps - helping reduce the trip hazard from current fall protection practices.

INDUSTRIAL  
COMMERCIAL  
RESIDENTIAL

### ENGINEERING

**INNOVATIVE** with tie-off point above worker

**LIGHTWEIGHT** for easy handling and transportation

**DURABLE** construction of steel and aluminum

**MODULAR** for simple installation without tools

**PORTABLE** to quickly move on jobsite
