

# *Diggedi*

Welcome to the World of Diggedi.

CONFIDENTIAL

Founded by Carl Adam Freiholtz

+ Addia Cooper-Henry

# Listen. Play. Repeat.

The world's first audio memory game  
with music from your favorite artists.

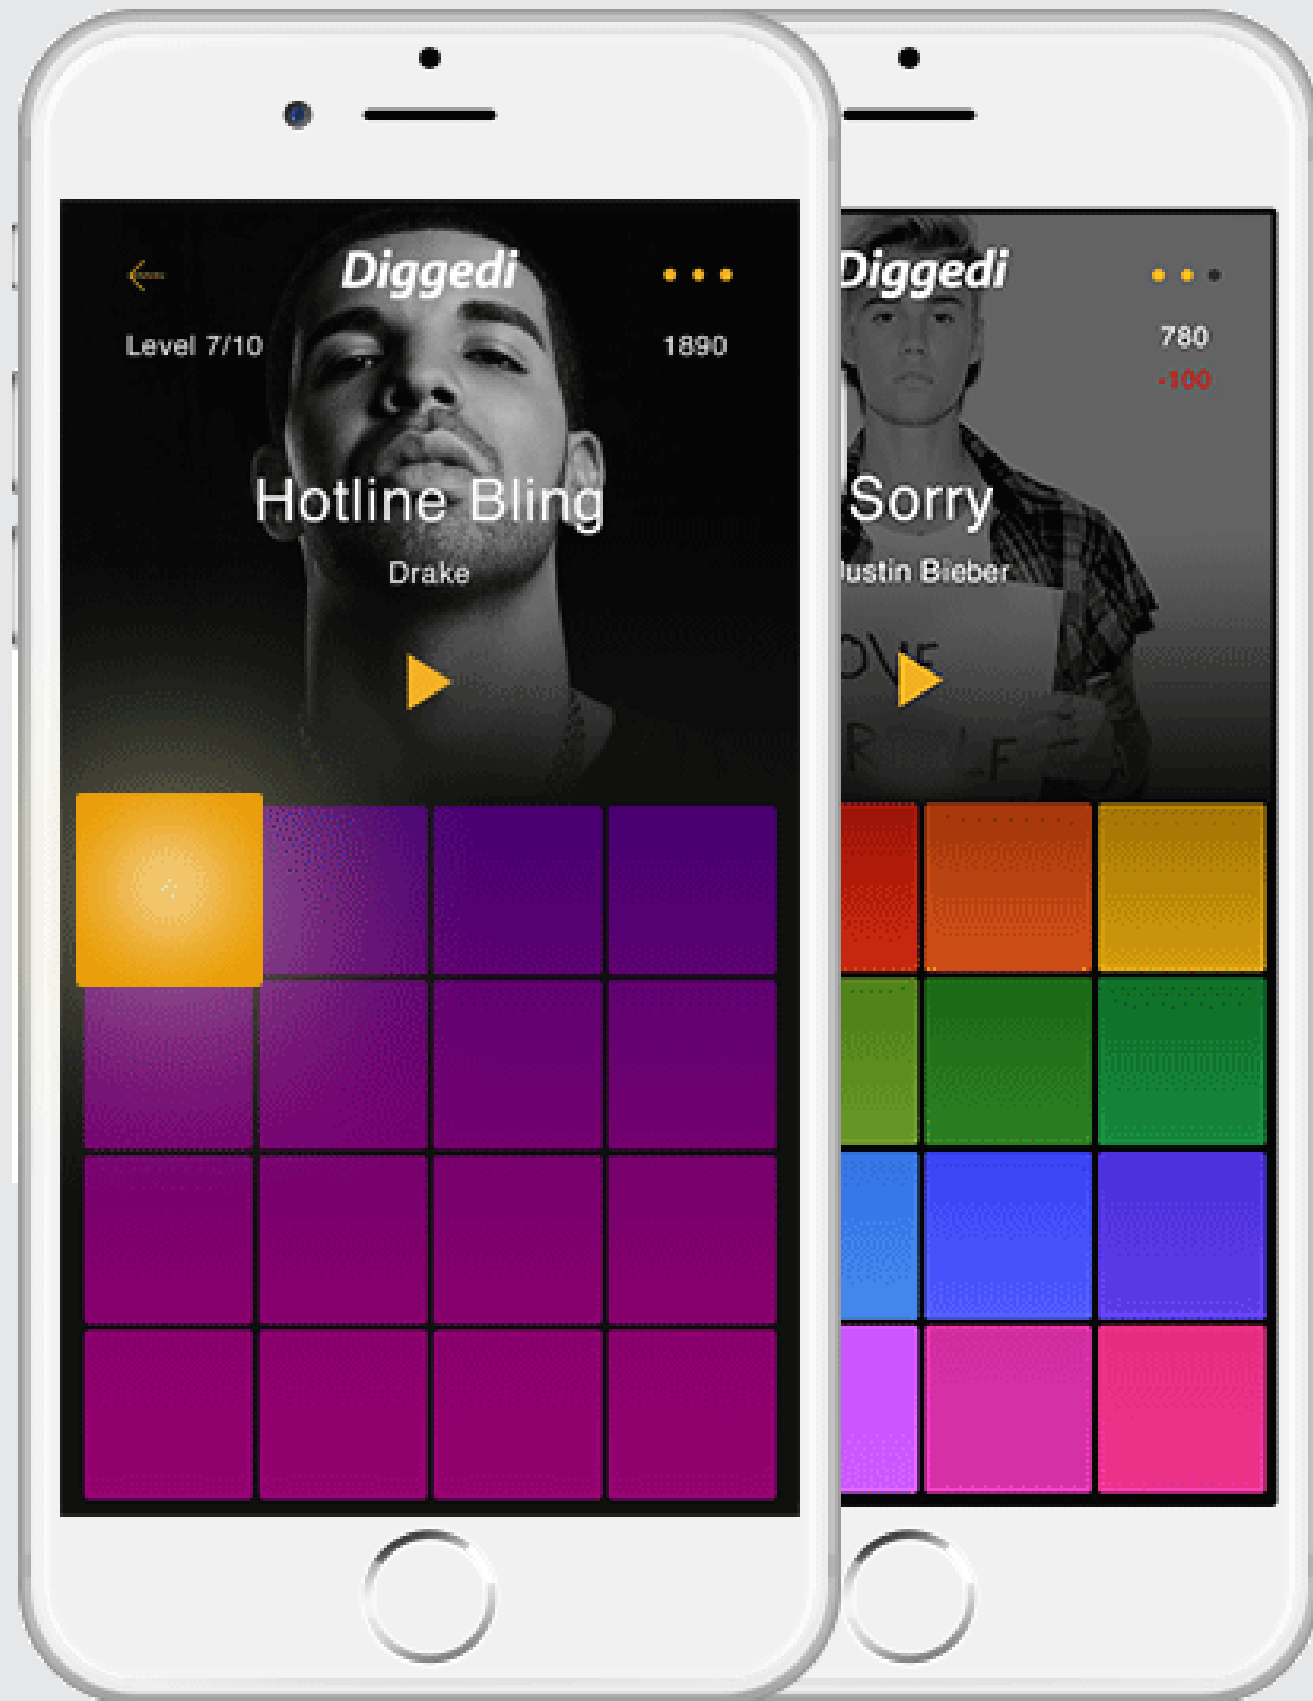

# MPC + SIMON

## INSPIRATION

Diggedi combines the proven success of the game "Simon" with the easy and fun music creation interface of an MPC Drum Machine/Sampler.

# How to play?

Watch and memorize the pattern. As soon as the guide pattern stops, repeat to create a perfect repetition. Start playing as soon as you see "GO".

The smoother the transition and the more on beat you are, the higher the score. Got it? Good!

Play on Playas!

# Diggedi

Listen. Play. Repeat.

# Entertainment

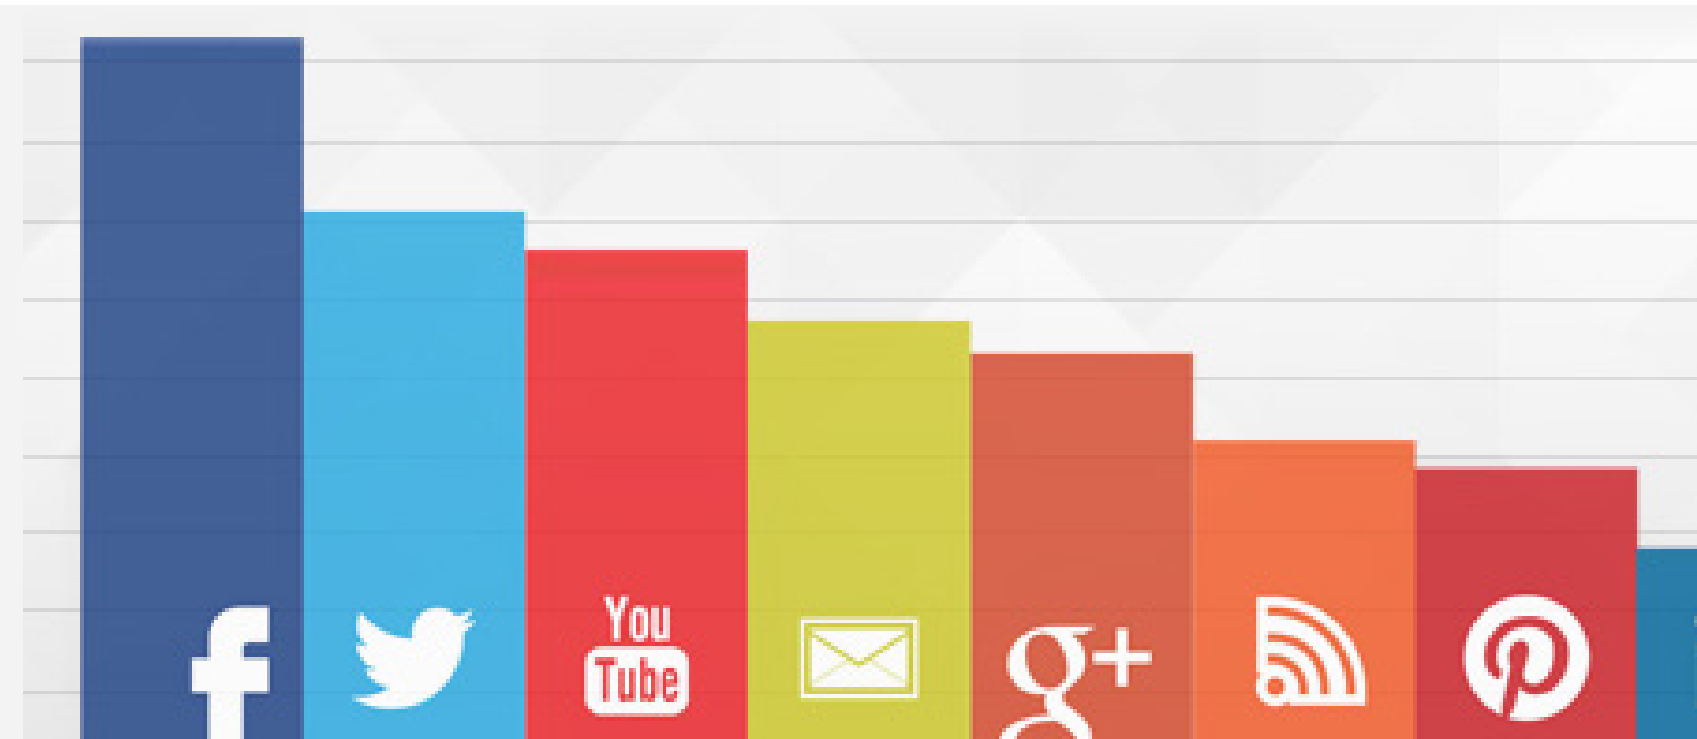

12 - 34+ year olds have a new way to practice their rhythm skills, challenge their brains, compete with friends, and earn points for rewards like exclusive access to events, products, experiences, and music from their favorite artists. With Diggedi, they explore and discover new artists while building their memory skills! This is the world of Diggedi and we are happy to share it with you!

Diggedi is a game where the music and gaming industries integrate seamlessly.  
It is a platform to introduce and promote new music for independent artists.

# Benefits for artists

- Playing the game has proven to increase songs getting stuck in people's minds.
- When finishing a song each gamer will be presented with links to the artist's websites, Spotify/Itunes/Soundcloud playlists, and Youtube channels to learn more about the artist and their music.
- Independent artists are added to mixed playlists with high trending/popular songs for increased visibility, being exposed to thousands of potential new fans and followers.
- Artists have a new and fun marketing tool to connect and engage with their fans.

# Thank You
