TractorPal V2.0

Press Release

FOR IMMEDIATE RELEASE

We are pleased to announce the New TractorPal Version 2.0 is is now available from App Store and on Google Play for FREE! Find it here:

TractorPal version 2.0 is rebuilt from the ground up on all new platform to run quicker and add features you wanted!

TractorPal keeps inventory and maintenance records for all your agriculture machines and attachments, including your cars and trucks. You are also able to email all your records to service dealers or potential buyers. Built by farmers in South Dakota for farmers all over the world, this app will simplify your machine care in three ways:

Track Your Inventory:
Log all of your large and small machinery and automobiles including tractors, pickups, lawn mowers, cars, combines, sprayers, loaders, skid loaders, backhoes, attachments, and more. TractorPal can track each item's serial number, model year, purchase date and price, original miles/hours, and you can even save a picture of your item.

Track Service and Receive Reminders:
TractorPal simplifies your record-keeping process. TractorPal records each item's maintenance (e.g., changing oil, filters, tires, and irregular repairs.), and will remind you when service is required. You can even set your own reminder intervals! This app will even record the part numbers you used!

Email Records:

Ever walk into the dealership and ask for all the filters for your machine, and they ask for your serial number or the part number you need? Now, all that impossible-to-remember information will be stored in your phone. Just email or show your phone to your parts person, it's that easy! With the service records at your fingertips, TractorPal makes selling your machine easier, whether the buyer is down the road or across the nation. With TractorPal this information is ready to go. Simply click 'email report ' and send.

Download for FREE right now on your Android device, iPhone, iPad, and iPod Touch.

Who Created it?

Volga, SD - Two guys from rural South Dakota got together and talked about how farmers currently record their inventory and maintenance records. They do it just like their Dad and Grandpa; a notebook. With the new generation of farmers taking over the family farms we thought an app would greatly help to record service records. After figuring out what was missing from options already available, we set out to create TractorPal, an app built by farmers for farmers.
