ABOUT YUCHIP

SHENZHEN YUCHIP LIGHTING CO.,LTD is the leading LED display and lighting solution provider in China and has delivered the systems to more than 80 countries around the world. Many of those projects done by Yuchip have enabled the customer various benefits of the new technology and recognized as new landmark of the site.

With years production experience and thousands project installed, Yuchip is not only a products manufacture, but a solution provider! Customers just need to inform us your usage areas and desired functions, we would design and provide you a most suitable solution. We take the time to listen and ensure the customer is satisfied with the performance of products and service received from YUCHIP.

Our production strictly conforms to ISO9001:2008 control system and products compliant with CE, RoHs, FCC, UL and TUV certificates etc, plus providing customers 24-36-60 months warrantee period. With our 300 professional production staffs and management team working in 10000sqm facility area and local distributors in Italy, Poland, Malaysia, Thailand, America etc. YUCHIP aims to establish long-term cooperation relationship with customers based on high quality LED products, competitive price and timely after-sales service.

We shall always be very happy to hear from you and will carefully consider any proposals likely to lead to business between us.

RENTAL LED DISPLAY IR SERIES

YUCHIP New Indoor Rental LED creen design incorporates many aesthetic elements,from material and texture to slim luster,deduce the beauty of science and technology.

Perfect Structure

YUCHIP has the domestic top design team,the design innovation has its own unique philosophy,with a number of core technologies.Innovative structural design,avant-garde body lines,Give you extraordinary experience.

Two-Way Maintenance

In order to meet the various aspects of the rental led screen field,a new generation of rental led display design for two-way maintenance,from the front and back of the screen can come up with the unit board and power supply,it will more easy for repairing.

Humanized Design

Four corner side with humanization anti-skidhandle.Compared with traditional cabinet,it is more beautiful and convenient.

CURTAIN LED DISPLAY OFC SERIES

- ▶ Good heat dissipation: Aluminium alloy kit, separation design of light bars and power supply;
- ▶ Save installation time, convenient service: Low maintenance cost;
- ▶ Thinnest part only 12mm: with structure only 110mm;
- ▶ Long life time: 100000 hours, stable display;
- ▶ Adjustable brightness: Fit different environment needs;
- ▶ Quick installation: Less than 10s per unit;
- ▶ Adopted high efficient chips: Linear arrangement, high brightness & contrast;
- ▶ both general & customized system: Meet various broadcasting requirements;
- ▶ Multi-screen display: Multichannel switch freely.

CURTAIN LED DISPLAY IC SERIES

- ▶ 500x500mm and 500x1000mm cabinet size;
- ▶ Die casting aluminum material, ultra light weight;
- ▶ High refresh rate, high brightness and high contrast which make the screen without any delay and smear phenomenon under directly sunlight.
- ▶ Both hanging up and put on stage stand installation;
- ▶ HDMI, SDI multi signal input, High RF for Live broadcast.
- ▶ High debugging brightness and no damage to gray scale, achieving the debugging technology for nice image.

CURTAIN LED DISPLAY OC SERIES

- ▶ 500mm*500mm and 500mm*1000mm cabinet can be chosen;
- ▶ Die-casting aluminum design, the characteristics of both are thin and light, 500mm * 500mm cabinet only 7.5kg;
- ▶ High refresh rate, high brightness and high contrast, clear picture without flicker and distortion;
- ▶ Advanced cabinet design, seamless, ensuring the flatness of the entire screen;
- ▶ 3 years' warranty, easy to install & maintenance. products is certified by CE,Rohs,FCC etc.

Inward and outward curve design;
Curved cabinet, $\pm 5^\circ$, $\pm 10^\circ$ and $\pm 30^\circ$ curve angle adjustable;

Support hanging up by truss and put on stage stand installation;

LED PostAir

HD Image Quality, Refresh rate up to 3840Hz;
 Brightness at 1500nits, 3 times brighter than LCD display;
 160° view angle; High color reproduction;
 Compare with indoor LCD poster, with high brightness, super thin & low-power consumption,
 LED Digital poster is also suitable for bright occasion.

Control Methods

Synchronized / asynchronous system Plug and play, Cross-platform operation Real time play by connecting to network; The screen can be controlled with fixed or portable Windows, IOS & Android devices.

The content can be refreshed and stored in built-in media player through WIFI or USB to achieve asynchronous play.

Multi-installation Method

Multi-installation Method Suitable for lifting, wall-mounted, floor-standing and creative installation like inclined strut installation.

Transparent LED Display Feature Introduce:

Indoor installation for outdoor viewing

Easy to maintenance, safety, less approval processes than outdoor advertising .

Ultra-Transparent

Permeability is 60% -90%, translucent, ventilation, does not affect the lighting and line of sight, It's very suitable for installing glass walls.

Customized is available

Modern transparent LED display has all kinds of types, the structure is complex, the size isn't the same, the standard cabinet couldn't meet the needs of all projects , CONCRE can be customized the best product solution according to the reality situation, to ensure the permeability of transparent LED display, completeness of display and consistency.

Thin and light, Easy to Installation

No need steel structure: directly attached to the wall installation, saving space and installation costs.

Energy saving, fast cooling

Easy to maintenance, safety, less approval processes than outdoor advertising .

TAXI TOP LED DISPLAY

Outdoor taxi top LED display is a new type of electronic media advertising with elegant and attractive appearance, mainly installed on taxis, buses and other vehicles as a terminal carrier, the purpose is to form a new generation of networked, intelligent, digital outdoor media. This media is an integration of outdoor, electronics, mobile and Wi-Fi etc.

YUCHIP taxi top advertising signs product features:

- ▶ 1. Outdoor P2.5、 P5、 P6;
- ▶ 2. Height, width and thickness changeable;
- ▶ 3. 3G/Wifi/USB/RJ45 control method optional;
- ▶ 4. Up to 4GB memory and USB extension support;
- ▶ 5. Double sided, playing same and different content;
- ▶ 6. Fixed on top of taxi / car by fixture, screw and magnet;

TRUCK LED DISPLAY OT SERIES

- ▶ Movable: Mounted on truck and trailer mounted system. The setting up and dismantling takes less than 30 minutes;
- ▶ Self-contained generator: Utilizing noise-less generator ensure truck LED display locate anywhere anytime for working;
- ▶ Hydraulic system: Rise LED display and turn around 360 degrees, outreaching more audience to gain advertising revenue;
- ▶ 3G, GPRS, Wifi control system available.

LED DISPLAY BALL

Sphere LED display (we can also call them sphere LED screen or LED panel, LED global, LED ball) is a creative LED display with a ball shape. It is our patent product developed in 2011. Through improvement and R&D of four years, the technology is mature and promising now.

Application:

Up to now, we have accepted orders from casino, shopping mall, bar, disco, exhibition hall, besides it is also widely used in museum, planetarium, sports stadium, airport, hotel, railway station, children's palace, gymnasium, lounge or waiting hall, large open space, etc.

Main feature:

1. High definition: P4.8 SMD2121;
2. Multi diameter option: 1.2m, 1.5m, 1.8m, 2.4m, 3.0m and 3.6m;
3. Hanging up and on stand installation methods equipped;
4. Nova, Mooncell synchronous control system optional;

	Front/Rear IP Level	IP43					
	Working temperature(°C)	-20~ +40					
	Stored temperature(°C)	-40~ +80					
	Operation humidity(RH)	0~95%					
	Display Lifetime(hours)	10 years or more(natural environment);100000 hours(ideal environment)					
Maintenance	Front Side						
Working Voltage	AC110 / AC 220V 10% 47~63Hz						
Power consumption/m ²	Max:600W/m ² ; Ave:250W/m ²						
Out of controlled dot	≤3/10,000 (Out of controlled dots means the pixels of which the brightness and the wave length are both >10% depart to the normal one)						

Sphere LED Display Installation Method:

DUAL MAINTENANCE LED DISPLAY OF DL SERIES

- ▶ Convenient maintenance: Both front and rear maintenance available;
- ▶ Easy maintenance: No screws between LED module and cabinet, it only takes a few seconds to disassemble;
- ▶ Space saving: For installation site limiting backside space, this dual maintenance is a perfect option;
- ▶ Widely used as mounted on building LED display.

COMMERCIAL-OF DL		OF-4.8DL	OF-5.95DL	OF-6.67	OF-8DL	OF-10DL	OF-16DL	
LED Module	Pixel pitch(mm)	4.8	5.95	6.67	8	10	20	
	Pixel configuration	SMD2727			SMD3535

STADIUM LED DISPLAY OS SERIES

- ▶ Soft module mask: To protect players from being hurt when hit on the perimeter LED screens;
- ▶ Soft pillow: To protect players from being hurt when crash into the sport LED screen;
- ▶ Adjustable back brackets: To adjust screens lean angle for wider viewing angle, outreaching advertising to more audience;
- ▶ High refresh rate frequency: Flick free display effect for live broadcast;
- ▶ Dual computer control system: Backup computer control system to ensure stadium LED display working well even when one computer signal off.
