# AVALAN RS
QUICK START GUIDE

This device allows remote browser access to any device without network settings or IT knowledge. The user can choose to access the connected device with HTTP, HTTPS, SSH, telnet or any port.

1 PHYSICAL SETUP

1. Connect the Network port to your Internet connected switch.
2. Connect the Device port to your Device.
3. Plug the provided power adapter into the AvaLAN RS device.

2 ACTIVATE ONLINE

Once your order is placed you will receive an email confirmation with a custom link and login credentials to activate your device.

The website will ask for your username (email address) and a default password.
After logging in, a prompt will require entering a new password.
