MDaemon®
Private Cloud

Key Features

- Detect and disable hijacked email accounts. Settings enable administrators to adjust parameters that best fit their environment.

- Intuitive Mobile Device Management console to easily manage BYOD mobility environments. View, set and change the most used SMB IT mobile device policies (lock, remote wipe, etc.).

- Versatile web-based email (WorldClient) delivers full collaboration, including documnet sharing and a closed Instant Messaging application.

- Custom scheduling and mail queuing for more flexible outbound mail management.

- Powerful Spam Filter analyzes messages to increase spam recognition over time and improve inbox cleanliness.

- Backscatter Protection prevents the receipt of unwanted messages due to a forged email return path.

Email, Collaboration, Instant Messaging, and Mobile Device Management Trusted by SMEs

CloudMailStore (CMS) is a leading provider of Email solutions. We currently manage over 25,000 MDaemon Private Cloud mailboxes for various hosters, resellers and web development agencies. MDaemon Private Cloud Hosted Email offers very affordable hosted email for your organization with valuable features and flexibility. With an easy-to-use web mail client, users can communicate, collaborate, share files and use integrated Instant Messaging. We offer mail server software, management and migration services. No long term contracts required. All our services are billed monthly.

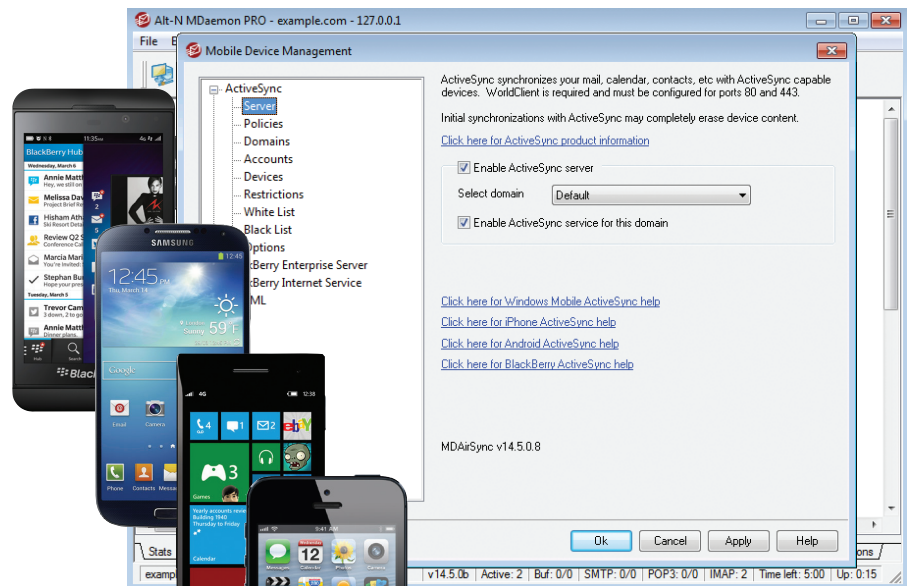

Mobile Device Management (MDM) - A simple interface allows administrators to easily manage a company's Bring Your Own Device (BYOD) environment. Smartphones and tablets using Android, iOS, Windows and BlackBerry 10 can be managed via Microsoft ActiveSync using select pre-defined policies, or you can create custom policies.

Autodiscover Service - Users can easily create an account on their mobile device by entering their email address and password. They do not need to know their server name to set up the email service on a device.

- **Cloud Backup Solution**

- **Managed/Intensive Application Hosting**

- **Domain Name Registrations (Most Extensions)**

- **Exchange Hosted Solutions**

- **Newsletter Service**

- **VOIP Solutions**

- **Custom Web Application Development**
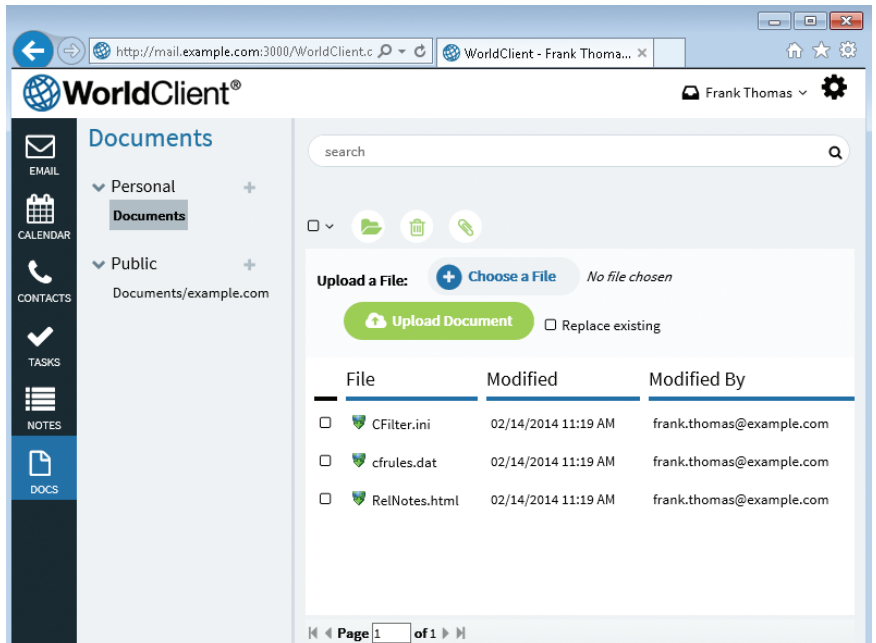

WorldClient document folders have full ACL (access control list) controls that can be used to set permissions and sharing rules. All file types can be shared through the system. Improved search capabilities make it easy to search shared documents by file name for easy retrieval, review, and attachment to new messages.

The WorldClient Instant Messenger plug-in, included with MDaemon, provides closed Instant Messaging (IM) with file sharing and group chat, address book synchronization, and an email notification tray applet.

Web-based Remote Administration showing mail routing information displayed in Colorized Session Logs. This allows protocol commands and errors to stand out for easier review and troubleshooting.
