JetSwiss Aviation Celebrates 10 Years of Excellence in Pre-Owned Pilatus Aircraft Sales

Overland Park, KS – September 3, 2024– JetSwiss Aviation, a leading authority in Pre-Owned Pilatus aircraft sales, management, and ownership, is proud to announce its 10-year anniversary. Founded on a deep-rooted passion for private aviation and an unparalleled knowledge of the Pilatus program, JetSwiss has become synonymous with excellence in the industry.

"It all started with a casual flight in a small plane, piloted by a family friend," said Don "Bub" Peterson, Founder of JetSwiss Aviation. "Having an opportunity to be a part of the PC-12 program from the beginning and seeing the Pilatus culture firsthand, ignited a lifelong passion for these incredible machines and ultimately led to the creation of JetSwiss."

Past: A Passion for Pilatus

JetSwiss' journey has been fueled by unwavering dedication to clients and a relentless pursuit of perfection in every aspect of Pilatus ownership. Peterson, inspired by the Swiss culture and his experience in the Pilatus program, recognized the importance of precision, reliability, and meticulous attention to detail. He has applied these principles to create a pre-owned aircraft business model unlike any other.

Over the past decade, JetSwiss has established itself as a trusted partner for hundreds of private clients and high-net-worth individuals seeking to navigate the complexities of aircraft ownership. With a hyper-focus on the Pilatus PC-12, the company leverages its extensive knowledge of the aircraft and over 25 years of program experience to deliver exceptional value, diligence, and peace of mind to its clients.

Present: A Remarkable Product Meets Unmatched Expertise

"Our business model is deeply rooted in the Swiss culture of precision, reliability, and attention to detail," Peterson added. "We've spent countless hours refining our processes and protocols to minimize risks and maximize rewards for our clients. This commitment has resulted in a remarkable 65% repeat and referral business, a testament to our unwavering dedication to customer satisfaction."

In addition, JetSwiss' five proprietary reports for buying and selling Pilatus aircraft are setting industry standards to a new level. The company's expertise has also made it a key player in the global pre-owned Pilatus market, with involvement in over 20% of worldwide transactions.

"We've built our reputation on transparency, integrity, and unparalleled service," Peterson emphasized. "Our clients trust us to guide them through every step of the aircraft ownership journey. Whether it's acquiring their first Pilatus or expanding their fleet, we are committed to exceeding their expectations."

Future: Continued Growth and Impeccable Service

As JetSwiss celebrates this significant milestone, the company remains focused on its core values and looks forward to continued growth and success in the years to come. New service offerings are currently being developed to further enhance the client experience, further solidifying JetSwiss as the global Pilatus Pre-Owned leader.
