

CORECOMPETE

DELIVER VALUE FROM BIG DATA

**Accelerate
Your
Digital
Transformation**

WHAT WE DO

CoreCompete helps enterprises accelerate, innovate and operationalize their big data and analytics initiatives. We differentiate ourselves by bringing an understanding of the industry domain, combining it with our versatility in data, analytics and technology and delivering systems which help you make millions of better decisions everyday. We strive to create trusted and long-term partnerships with our clients and delight them with our agility, initiative and innovation.

YOUR GOALS	YOUR CHALLENGES	WE CAN HELP YOU
Modernize to create an Elastic Analytics Infrastructure	<ul style="list-style-type: none">• Technology landscape is complex and choices are overwhelming• Your team is missing critical skills• Operating big data platforms is not a core competency	 ACCELERATE Agile Analytics on Cloud Experts in SAS/ Analytics/ Hadoop & Cloud Analytic Platform Modernization
Deliver new capabilities that drive value and innovation	<ul style="list-style-type: none">• Executives differ in their priorities• Ideas are not completely fleshed out, lots of things to figure out• Current team is already busy with existing priorities	 INNOVATE Big Data Advisory Services Analytical Solution Development
Scale business impact across the enterprise	<ul style="list-style-type: none">• Need automation and integration with enterprise systems which is complex• Data scientists are unable to translate ideas into production applications• Business decision-makers continue to rely on gut instinct for daily decision-making	 OPERATIONALIZE End to End Systems Enterprise Integration Change Management Support Big Data as a Service with 24 x 7 support (ISO 27001 certified)

OUR DIFFERENCE

Our holistic approach brings together the right combination of Data, Analytics and Technology with Agile Delivery to deliver business value.

BIG DATA VALUE

=

D X A X T X A

DATA

Strong capabilities in data ingestion, data quality and data engineering for a variety of sources including structured, unstructured, syndicated and machine-generated data

ANALYTICS

Ability to leverage the latest advances in machine learning, forecasting and optimization to create the highest performing models

TECHNOLOGY

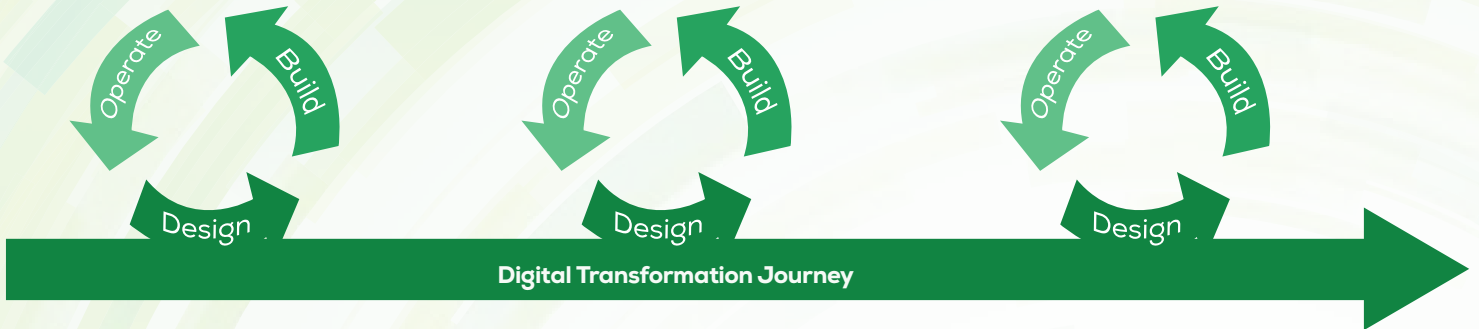

Expertise in the latest data engineering and cloud technologies to address complex and potentially large scale problems cost-effectively and with a high degree of automation

AGILITY

Experience and ability to simplify complex problems and technologies into incremental releases that create business value

HOW WE ENGAGE

Digital Transformation is a journey. We will help you iterate faster in each stage of your journey.

Design

Senior business consultants and solution architects work closely with you to define the 'What' and 'Why' of your big data initiatives. Integrating our industry and technical expertise with your priorities, we provide practical roadmaps and proof-of-concepts which create value.

Build

Analytical solutions evolve over time and often cannot be completely specified upfront. Our business and technical consultants work in a high-touch model for on-site engagement that minimizes these risks while utilizing a global delivery model for round-the-clock productivity and cost-effectiveness.

Operate

IT is constantly evolving with Cloud, lacking the critical expertise and resources to support innovation. Companies require these increasingly complex solutions to be provided as a service. CoreCompete fulfills this need by providing ISO 27001 certified, fully managed services for your big data and analytical cloud solutions.

TECHNOLOGY LEADERSHIP

We have invested in developing strong technical and go-to market partnerships with leading technology vendors. Our ability to bring the breadth and depth of capabilities in analytics, big data and cloud technologies is helping us deliver significant client success.

SAS

1st partner to have competencies across data management, analytics and visualization. CoreCompete has the largest number of SAS certified consultants. Partner of the Year 2015 (N. Europe)

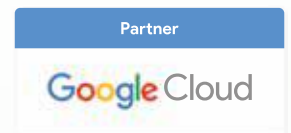

Hortonworks

Architected some of the largest hadoop clusters to address the most stringent data security and performance requirements

Amazon Web Services

1st AWS Advanced Consulting Partner to achieve audited status for AWS Managed Services Program Partner and AWS Big Data Competency

Google Cloud Platform

Delivering Google-Scale Machine Learning and Big Data capabilities to retailers around the world

OUR DNA

In these times of incessant change and activity, we are building an organization based on the enduring values of creating customer delight, being trustworthy and taking initiative.

Our engagements demonstrate that we live these values. We strive to create delight by proactively taking initiatives and being trustworthy with every piece of advice we give. Let us become your partner to help you accelerate, innovate and operationalize big data initiatives.
