Installation of Lights/Equipment: Prior to installing this mounting plate on a compatible truck, operators can decide where they want their permanent mount lights and other equipment to be mounted and drill the appropriate holes in the aluminum mounting plate. Once the holes are drilled, the light or other piece of equipment can be mounted to the plate. Then the entire assembly can be mounted to the truck via the third brake light as explained below.

Truck Installation: The VMP-GMC-SRA-2019-LED-2015 is easy to install and requires absolutely NO drilling to mount to the truck. This mounting plate installs via the 3rd brake light on 2019 GMC Sierra 1500 aluminum body pickup trucks between the body of the truck cab and the light. Operators simply remove their 3rd brake light, position the mounting plate bracket and reinstall the light through the bracket.
