ALL-NATURAL FORMULAS FOR ALL-NATURAL KIDS
DAILY DETOXIFICATION AND ORGAN SUPPORT

Developed by doctors, used in clinics, trusted by moms and dads.

WE LIVE IN A TOXIC WORLD

It used to be that the safest place on earth for our children was home, when they played in their yards, when they ate nothing but the purest foods. Their toys were made by hand. Their dreams were wrapped in a warm wool blanket.

But now, everything has changed. Many things have a cold blanket of toxins. From the moment your children are born, over 200 chemicals course through their delicate veins.

WHAT ARE TOXINS?

Toxins are chemicals, pesticides, and heavy metals like mercury, arsenic, and lead. If the body cannot eliminate these toxins, they are stored in body fat and accumulate over time.

Children are exposed to pesticides and other toxins in their home, school, and lawn, on playgrounds, and public parks.

- Toxins block your child's body's ability to absorb nutrients
- Toxins negatively impact developmental processes causing:
 - Angry outbursts
 - Frustration and anxiety
 - Fatigue and sluggishness
 - Fluctuation with moods and behaviors
 - Inability to focus, concentrate, or finish work

TOXINS ON THE RISE

Parts Per Million

- Heavy Metals
- Chemicals/Pesticides
- Mycotoxins*

*Mycotoxins are metabolites (by-products) of the growth of molds. They have very real toxic side effects to other plants, animals, and humans.

HOW DO TOXINS GET INTO MY KID'S BODY?

WHY IS IT IMPORTANT TO SUPPORT CHILDREN'S ORGANS AS THEY GROW?

- Kids organs have to work twice as hard as adults do!
- The organs that eliminate toxins often become congested
- Toxins negatively impact critical growing milestones such as:
 - Brain growth
 - Nerve development
 - Gastrointestinal health
 - Social maturity and overall wellbeing

Parents can help their kids by safely and effectively removing toxins and supporting different organ systems responsible for healthy growth with BIORAY KIDS® liquid herbal formulas.

WHY ARE BIORAY KIDS® SO EFFECTIVE?

NDF® (Natural Detox Factors) sticks to heavy metals, chemicals, and pesticides and carries them safely out of the body. NDF® is in every BIORAY KIDS® product along with herbs that support the healthy function of kids' organs!

DOCTOR-APPROVED INGREDIENTS... KID-APPROVED TASTE

The doctor-approved key detox ingredient in NDF® is yaeyama chlorella. It is a freshwater green algae ("green food") that is densely packed with 60% protein, calcium, phosphorus, magnesium, iron, zinc, vitamins A, B1, C, E and K and the carotenoids beta carotene and lutein.

Wow, nutrition AND detox in one simple food!

In order for yaeyama chlorella to most effectively bind to heavy metals and chemicals in your child's body, it must be broken down into small micrometers, which is many times smaller than the diameter of a human hair.

At this size, this green food wonder binds to the toxins, and then safely moves them out of the tissue, which will then be excreted through the kidneys and/or bowel. A process called "detox."

Prior to our process of breaking down the yaeyama chlorella into micrometer particles, the cell walls are intact.

Our unique process breaks down the chlorella's cell walls.

At the size you see here, millions of BIORAY KIDS® chlorella particles stick to toxins and safely carry them out of body.
