

Soooo! You Think Your S#!T Don't Stink?

Doo Drops Inc. Announces the Launch of Doo Drops

Titusville, Florida – Doo Drops, Inc is excited to announce the launch of Doo Drops, a deodorizing tablet that traps the smell so no one can tell. The official launch date for Doo Drops was March 25, 2017.

Doo Drops will eliminate any odor before you hit the can. It is simple, just throw and go! A no mess dry tablet that conceals and is easy to use and carry, made of non-toxic ingredients so you can feel good about smelling good.

“The idea of Doo Drops happened in 2016 when my sister religiously carried a poop spray with her in her purse for fear of pooping in public with nothing to conceal it. While she was at the dentist office, duty called and she went to the bathroom and realized that the bottle leaked out all over her purse and ruined it, along with everything inside! When she came out, a dental assistant was waiting, unfortunately going into a fog of poop odor. Later that day she told me about this and was off to buy another purse. After explaining this to a coworker, we decided a tablet was necessary instead of the messy liquids that are on the market. We went to work on it, thus creating... The Doo Drop!”
