

Corporate Fact Sheet

Corporate Overview

Founded in 2001, Driven, Inc., a C-corp, has built its reputation as the top eDiscovery solutions provider by excelling in complex data challenges. In 2009, Driven launched ONE as the first eDiscovery software platform to handle Processing, ECA, Review, Production and Case Management in a single environment. This background of innovation has resulted in Driven developing tools, creative workflow, and a highly secure and scalable infrastructure.

Driven is a unique hybrid of a software manufacturer, world-class service provider, and eDiscovery consultancy. This makes Driven a true information management company and allows it to support its customers across the data lifecycle. Our view is to excel at reducing the cost and risk associated with discovery by shrinking data footprints and creating a more graceful discovery process. Driven's goal is to help our clients increase efficiency, decrease cost, and gain a competitive edge.

Driven's end-to-end solution includes:

- | | |
|--------------------------------|--------------------------------|
| 1. Information Governance | 9. Analytics |
| 2. Defensible Deletion | 10. Processing |
| 3. Data Mapping | 11. Technology-Assisted Review |
| 4. Legal Hold | 12. Managed Review |
| 5. Custodial Interviews | 13. Production |
| 6. Remote & On-Site Collection | 14. Presentation |
| 7. Preservation | 15. Managed Services |
| 8. Early Case Assessment | |

Driven Teams Enhance Customer Support

Even the best tools and services may not meet your needs if they are not coupled with guidance from someone who has been in your position. Assistance from an experienced user may be just what is needed to leverage those tools in the most efficient and effective way for your project.

Led by experienced eDiscovery attorneys, Driven's service teams are available to advise on best practices for defensibility and efficiency throughout every phase of data management and eDiscovery.

Project Management and Litigation Support Services

Driven's support teams are available 24/7/365, so clients are never without assistance. Certified team members (Relativity, ONE, PMP, CAAT) offer their expertise to manage all data lifecycle phases, budgets, deadlines and compliances. If clients are already involved in litigation, Driven's experienced attorneys and certified staff can provide consultative support to assist with data management and eDiscovery issues.

Consulting

Driven's team of expert attorneys, many of whom with Fortune 100 and AMLAW 100 backgrounds, can assist clients in all areas of data management, eDiscovery, and process refinement. Their vertical expertise spans a vast number of disciplines, and they can provide "C-Suite"-level communication on many areas of the law, including: Mergers & Acquisitions (M&A), Structured Data, Energy, Investigations, Banking, etc.

Managed Review

Driven's Managed Review team integrates the full power of the technology offering with expert attorney reviewers. This maximizes the efficiency of the entire review process, and enables cost predictability, a streamlined workflow, deadline compliance and the most accurate document review. Our services include:

- Fixed-fee attorney staffing
- Assistance in drafting an efficient review protocol that includes background of case
- Tagging protocols
- Explanation of case-specific substantive issues highlighting best practices
- Implementation of QC controls created in conjunction with the Review Protocol
- Provision of document review facilities and project management in a variety of jurisdictions
- Provision of daily data review metrics
- Facilitation of communication among reviewers, counsel and client in most efficient way possible

Managed Services

Driven's Managed Services (DMS) enables law firms and corporations the ability to revolutionize their discovery process. DMS allows you to diversify and augment your software offerings, while achieving the highest security, reliability, and cost transparency. DMS enables all of this without having to heavily invest in infrastructure, software and personnel. Traditionally, eDiscovery services have been consumed in either a full service model (SaaS) or software purchase and infrastructure model. The result was an unpredictable or burdensome solution with a high potential for cost escalation.
