# ERP Integration Platform for Shopify

The eBridge Connections integration platform automates vital business processes and eliminates the need for manual data entry by enabling bi-directional data exchange between Shopify and the leading ERP and accounting packages.

Connect with any ERP or Accounting Package

eBridge Connections powers Shopify integration with the leading ERP and accounting packages such as Microsoft Dynamics AX, GP, NAV & SL, Sage 100, 300 & 500, NetSuite, SAP Business One, Epicor Enterprise and many others.

Streamline Item, Order and Customer Data Processing

The eBridge Connections integration platform facilitates automated, bi-directional data exchange between business platforms, eliminating data re-keying while reducing costly errors. This automated integration can be performed over numerous touch points to streamline business processes. eBridge integration solutions enable orders, inventory levels, product data, shipping updates, and customer information to move seamlessly between systems, resulting in satisfied customers and efficient operations.

Key Benefits

- Eliminate manual data entry and avoid costly errors
- Increase the speed of data exchange, improving customer service efficiency
- Reduce deployment time by utilizing turnkey integration solutions
- Upgrade your ERP or add connections (marketplaces, EDI, CRM) with ease
- Free up time and resources to focus on your business

Feature Summary

- Bi-directional, automated data integration between Shopify and a connected ERP or accounting system
- Multi-store, and multi-platform (Marketplaces, CRM, EDI) support
- A fully-managed solution with connectivity, data translation and compliance all handled in the cloud; no-on premise software required
- Shared business rules that replace the need for mapping and reduce the total cost of ownership
- ePortal – a web-based application for data/document management and archiving
- Unlimited, 24/7 access to a North American-based support team

Integration Touch Points

Shopify → ERP	ERP → Shopify
Orders	Shipment Updates, Inventory, Product Updates

Project Delivery

eBridge Connections employs a personalized approach to project delivery. It begins with gaining a complete understanding of the client's requirements and then delivering a tailored integration solution that is both efficient and cost-effective. In each project, eBridge leverages a team of experienced and knowledgeable Integration Specialists, Implementation Consultants and Technical Support Agents to deliver a full-service integration solution.
