

Future-Proof Your Cybersecurity with ArmorPoint.

Every Component of a Comprehensive Cybersecurity Program.

ArmorPoint's cybersecurity program management ecosystem ensures your business stays ahead of threats with proactive, comprehensive security strategies tailored to your unique needs.

*“Only **59%** of organizations say their cybersecurity strategy has changed over the past two years.”*

Ponemon Institute

→ Managed SOC

RAPIDLY DETECT AND RESPOND TO THREATS

ArmorPoint's Managed SOC offers frontline defense against relentless cyber threats, combining proactive intelligence and integrated response protocols for unparalleled security.

ArmorPoint 360

Fully managed SecOps that delivers deep visibility and real-time threat remediation to strengthen every layer of your cybersecurity program.

SIEM, SOC, EDR

ArmorPoint OpenXDR

Consolidate data from critical resources, pinpointing imminent threats, facilitating swift action, and providing unmatched visibility into your security landscape using your own EDR.

SIEM, SOC, Your EDR

ArmorPoint MDR

Investigate events efficiently and effectively through end-to-end root cause analysis, real-time telemetry, and detailed forensics artifacts to defend every endpoint.

SIEM, EDR

→ Managed Risk

TURN VULNERABILITIES INTO STRATEGIC INSIGHTS

Comprehensive assessments and adaptive frameworks keep your business ahead of potential threats by providing actionable insights that inform your cybersecurity strategy.

Vulnerability Management

Access the guidance you need to design a practical risk appetite framework that prioritizes what's most critical in the context of your business.

- Monthly Internal and External Vulnerability Scanning
- Penetration Testing + Breach and Attack Simulations
- Security Reputation Monitoring
- Vulnerability Management Guidance

Human Risk Management

Change user behavior and reduce human risk to improve your first line of defense.

- Security Awareness Training
- Phishing Simulation
- Phishing Remediation

→ Managed Strategy

DYNAMIC SECURITY PLANNING

Craft your cybersecurity journey with ArmorPoint's Managed Strategy, offering expert-guided roadmaps and seamless integration for holistic security planning.

vCISO

Enlist seasoned cybersecurity leadership on a fixed term or ongoing basis to guide your risk management practices.

- Risk Assessment
- Program Development
- Policy Development

InfoSec Advisory Services

Benchmark the maturity of your security posture and shed light on unknown gaps with our proactive assessments and customized strategic roadmaps.

- Business Impact Assessment
- Security Posture Assessment
- Compliance Gap Assessment

The ArmorPoint Advantage.

Integrate all of your cybersecurity efforts into one unified, tactical path to future-proof cyber resilience.

CUSTOMIZABLE SECURITY SOLUTIONS

Your security needs are unique. Select from our diverse range of service levels, each meticulously designed to fit your specific requirements.

SEAMLESS INTEGRATION WITH EXISTING TECHNOLOGY

Integrate ArmorPoint seamlessly with your current tech stack. Enjoy enhanced security without the need for costly and disruptive system overhauls—all in a centralized ecosystem.

EXPERTISE WITHOUT THE EXPENSE

Tap into our wealth of cybersecurity experience without the high costs associated with in-house expertise.

Chart Your Path Towards Cyber Resilience with ArmorPoint.

Driven by your goals and backed by our expert, strategic guidance, our comprehensive security program management solutions:

- Balance your cybersecurity risk
- Streamline your SecOps
- Continuously recalibrate your posture
