COMPANY OVERVIEW

The Ultimate Customer Support Application

Tagove is a new online communication software that reinvents the relationship between customers and companies. It aims to re-create face-to-face communication by offering live text, voice and video chat, as well as screen sharing and co-browsing capabilities.

Tagove allows businesses to communicate more effectively with their customers and increase sales/conversions, and inevitably, a better customer experience.

WHY WE MADE IT

As the online market rapidly grows, more of us are shifting to the online world. But there was something missing, The human touch. If we wanted more information or help, it was impossible to get this help from an online website. We found the typing live chat software were too slow and lacked execution. And that's when it hit us! What is stopping us talking to the retailer as if we was 'in-store'. And just like that Tagove was born. With a click of a button you can have a voice/video call, whilst getting remote help.

THE MISSION

As the online market rapidly grows, more of us are shifting to the online world. But there was something missing, The human touch. If we wanted more information or help, it was impossible to get this help from an online website. We found the typing live chat software were too slow and lacked execution. And that's when it hit us! What is stopping us talking to the retailer as if we was 'in-store'. And just like that Tagove was born. With a click of a button you can have a voice/video call, whilst getting remote help.
