

REAN CLOUD Executive Summary

From figuring it out to getting it done, REAN Cloud is your full-service Cloud IT solutions provider. REAN Cloud, an **Amazon Web Services Premier Consulting Partner**, is a cloud-native firm with deep experience supporting legacy enterprise IT infrastructures and applications. Our key differentiator is our expertise in implementing architectures which support secure, compliant operations in highly regulated industries. REAN can ensure that your cloud-based applications are running securely and determine if your cloud resources are being optimally utilized. REAN has the resources to migrate you to the cloud (Infrastructure as a Service), and we ensure that your enterprise applications in the cloud will meet your security and compliance expectations and requirements.

Two of the most significant challenges in moving applications to the cloud include ensuring that your data is secure and meeting compliance requirements. The REAN team has extensive experience and can help you meet even the strictest regulatory requirements for data storage and management in the cloud. The REAN Cloud team has served Enterprise IT clients for years, and is now specializing in helping clients - small & large - use the cloud to become agile, realize cost savings, and enhance security and performance.

REAN Cloud focuses on the following industries: Financial Services, Health & Life Sciences, Education and Public Sector.
