RECYCLABLE

COFFEE BAG with VALVE ATTACHED

Balancing sustainability with protection & appeal for the complete coffee package

Available in M-seal, stand-up, flat bottom pouches & fractional packs.

The first bag with valve attached to pre-qualified for How2Recycle[®] in-store drop-off label, ENVi coffee bags are optimized to protect & extend the quality of roasted coffee products, with the added perk of recyclability.

Made with white, high barrier films for exceptional UV & gas protection, strong seals for leak-free integrity & compatible one-way degassing valves, ENVi coffee bags are optimized to extend the flavor & aroma profiles that make your roasts unique.

Part of Flair's ENVi program of PE mono-material solutions, our unique structures are engineered with superior strength, stiffness & printability to deliver wrinkle-free finished appeal that enhances your competitive edge. From full graphics support to Technical Service & Development, our packaging professionals collaborate with your brand to develop sustainable solutions, made for your sustainability goals.
