### **CLIMET APPOINTS *CRT-CLEANROOM TECHNOLOGY GMBH & TECHNISERV SA* DISTRIBUTION CHANNEL PARTNERS IN THE DACH REGION**

**Redlands, California (17 March 2016) – Climet Instruments Company, a Division of Venturedyne Ltd,** the leading manufacturer of high quality cleanroom particle counters and microbial samplers, today announced they have new DACH Region Distribution Channel Partners (e.g., Germany, Austria, and Switzerland).

Effective immediately *CRT-Cleanroom Technology GmbH* ([www.crt-gmbh.de](http://www.crt-gmbh.de)) will be responsible for sales, repair service, and calibration service in Germany, Austria, and Croatia. In Switzerland, TechniServe ([www.techniserv.ch](http://www.techniserv.ch)) will provide sales, repair, and calibration support.

We at Climet are very excited about this new opportunity both from a sales support perspective, as well as from a technical expertise perspective.

CRT and TechniServ provide substantially improved sales coverage, technical expertise, and a greater capacity to build, maintain, and create personal relationships with our customers. We anticipate that existing and new Climet customers will begin to see a marked improvement in both the frequency and quality of their interactions with our new channel partners. Moreover, four fully-manned facilities (two in Germany, and two in Switzerland) provide a combined footprint that offers a 200% improvement in market coverage.

From a technical perspective, TechniServ SA in Switzerland is ISO/IEC 17025 certified, and ISO 9001 certified. Additionally, TechniServ is STS 552 certified by the Swiss government, and will be in the near future extending to SCS certification for calibration of Climet environmental monitoring equipment. CRT is currently ISO 9001 certified, and will be serving the Austria and Germany markets for repair and ISO 17025 calibration service.

#### **About Climet Instruments Company**

Founded in 1962, Climet has been engaged in the manufacture of environmental monitoring equipment for use in cleanroom environments (particle counters and microbial samplers). Differentiated by quality, accuracy, and assurance... Climet offers users unparalleled service, return on investment, and the lowest Cost of Poor Quality (CoPQ) on their monitoring instrumentation.

#### **About CRT-Cleanroom Technology GmbH**

Founded in 2013, CRT specializes in cleanroom validation, as well as facility monitoring systems and

equipment. CRT has been using Climet particle counters for their validation since Company inception, and the Climet product line is a welcome addition to their Products Division and facility monitoring solutions. CRT has locations in Alsdorf and Bad Säckingen in Germany, as well as Lachen, Switzerland.

**About TechniServ**

Founded in 1993, TechniServ specializes in cleanroom validation, and has been using Climet particle counters for well in excess of 15 years. Their sister company, LogicAir, was founded in 1999, and specializes in cleanroom products and construction, as well as engineering, validation, and maintenance. TechniServ is located in CH-1292 Chambesy near Geneva, while LogicAir is located in Neuchâtel, Switzerland.
