Mobile-Enabled Leadership Development Application for the US Naval Academy

The Leaders Compass Mobile Application

The USNA sought a comprehensive, interactive, and agile mobile application to track competency and growth in every aspect of a Midshipman's education, development, and training from Plebe to First Class.

The Leader's Compass Application is the tracker and organizing platform for the USNA's leadership development program. Leaders Compass allows both the Midshipmen and the USNA Faculty to access, view, and track information in one place throughout their four-year education and training. Leaders Compass supports Midshipman competency improvements as these burgeoning leaders begin their service across the US Navy and US Marine Corps.

Accessible on any mobile device, and functioning with familiar swipe technology, Leaders Compass delivers an engaging and comprehensive user/customer experience (UX/CX) for competency development and data reporting throughout the USNA journey.

Innovative Data Management Solutions for the DoD

The USNA mission is to build the next generation of leaders to serve the nation. The Leaders Compass expands on the Academy tradition of nurturing excellence while leveraging 21st century technology to increase efficiency, performance, and engagement with full tracking, transparency, UX, and data management. Midshipmen are partners in their journey from day one. Faculty and USNA Leadership have an array of information at their fingertips to review academic, physical, military and competency areas, as well as training/development/events' collective effectiveness.

CORAS is a FedRAMP High SaaS platform working within the DoD, supporting complex challenges from the POM PPBE to S&T portfolio management and Strikeforce Readiness. Integrating with any existing software, and available on the NIPR/SIPR/JWICS, CORAS is an easy-to-use interactive tool providing dynamic, self-service configuration, auto-aggregation and combines automations, collaboration, Ai/ML data discovery, workflow, and reporting with no rip and replace requirements. CORAS provides centralized, advanced UI visualizations, bringing customers the ability to interact with their data in real-time. **The Leaders Compass** mobile application is a unique customer solution and part of our toolkit of powerful data management solutions. **See how we deliver real solutions to Decision Makers today.**
