

ezCACTM

Making the switch from costly coding software with minimal disruption has never been this easy

So what makes ezCACTM the most advanced CAC software?

Award winning #1 NLP engine for Healthcare:

ezNLPTM is the most accurate and comprehensive NLP engine in healthcare - Winner of SemEval two years in a row.

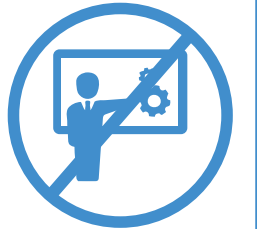

Key Benefits

End-to-end revenue cycle workflow with complete process automation resulting in improved DNFC days, A/R and CMI.

Requires virtually no training for HIM and coding professionals.

Complete audit trail for RAC, internal, CMS and other audits.

Real-time visibility of coding, organizational and financial metrics.

Improved coder productivity with deep collaboration between coders, CDI team and physicians.

No VPN, No Citrix. HIPAA compliant, cloud-based solution; easy to deploy, update and scale.

I like ezCAC and am more productive with it because it suggests ALL the codes. You don't have to go in and look up each individual code. I am excited because ezCAC has everything at your fingertips, your code books, smart tips, coding guidelines, everything is available through ezCAC and so you don't have to switch from one system to another to complete your coding. It is very coder friendly. It is really nice and a slick system.

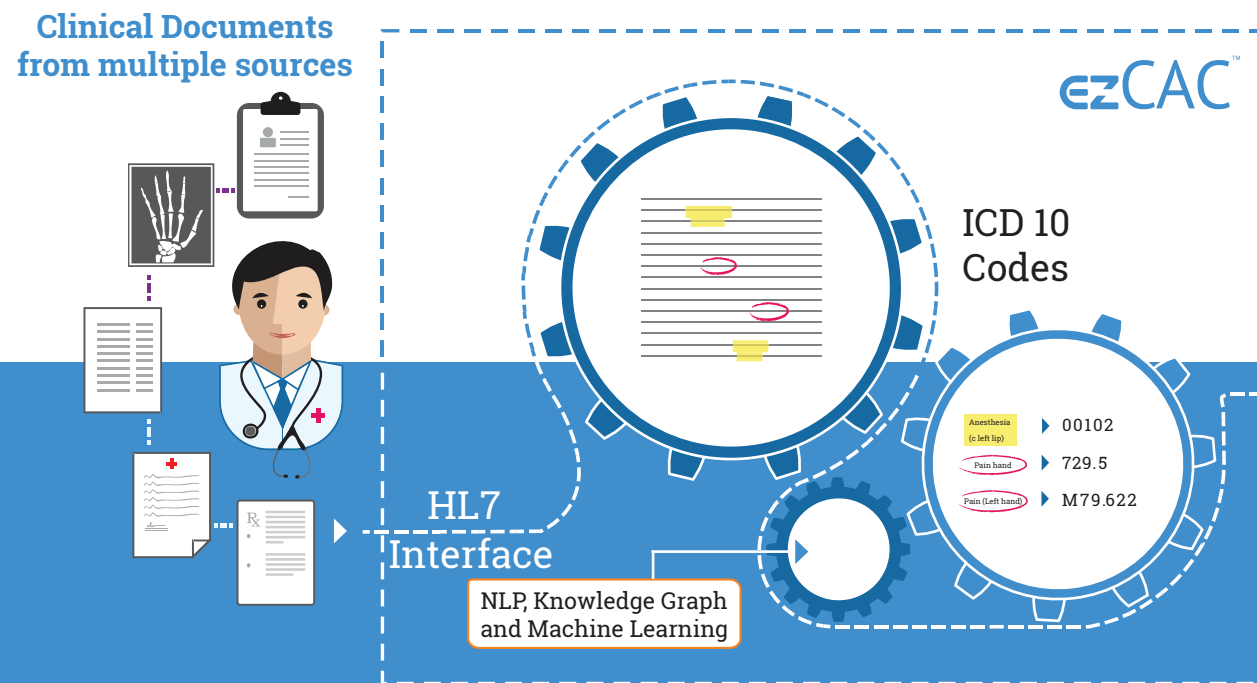

Tiffany, Lead IP Coder, Hospital in NC

Embedded ezEncoder™ and can integrate with 3M™ Encoder and Groupers.

Improved Quality, Consistency and Compliance

ezCAC reads and contextually interprets clinical documentation and applies coding guidelines. It automates abstraction and assigns highly accurate ICD-10-CM/PCS, and CPT/HCPCS for coder validation.

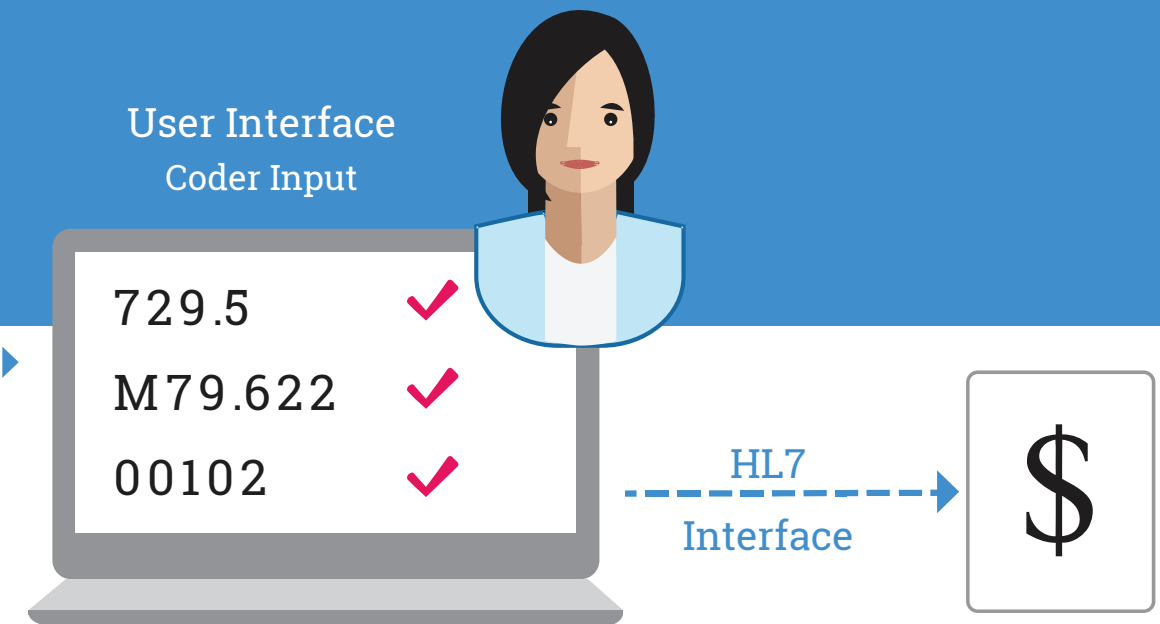

Real-time Visibility of Coding, Organizational and Financial Metrics

ezCAC delivers the power to visualize KPIs in a comprehensive and coherent fashion. It allows continuous supervision of the coding process by tracking coder productivity and accuracy. Coding supervisors are empowered to monitor each aspect of the coding process as it occurs, ensuring higher quality and productivity.

Enterprise-wide Collaboration. Eliminate silos!

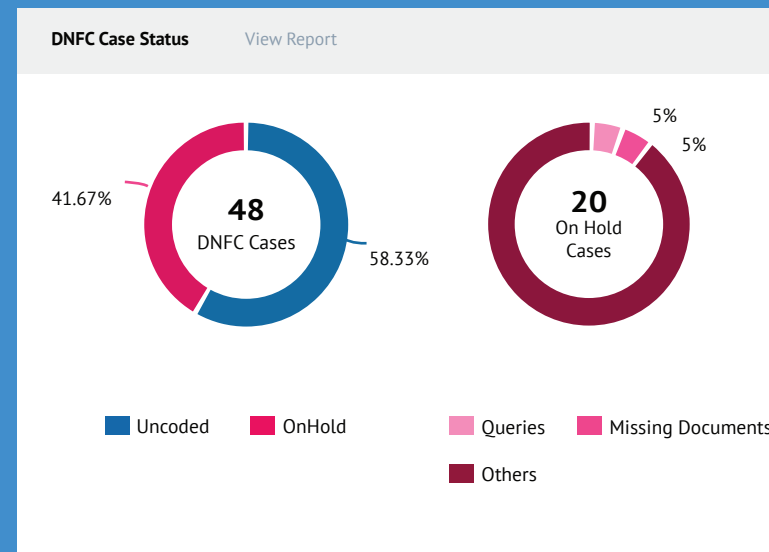

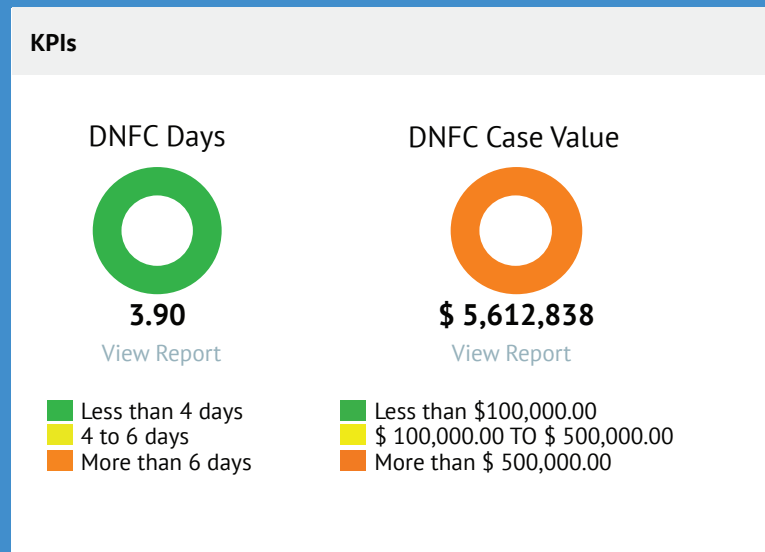

ezCAC enables proactive, data-driven decisions possible because it provides a singular integrated collaboration platform for all the key stakeholders such as coders, CDI, HIM, Physicians, internal auditors, and other key team members.

No Software. No Hardware. Simply Web

ezCAC is a HIPAA compliant, cloud-based, computer-assisted coding platform. Since ezCAC is a true web-based software, once interfaces are completed – there is no additional IT support required to cater to the staff that is involved with the coding workflow. We do it all!

Meaningful and Actionable Dashboard and Report

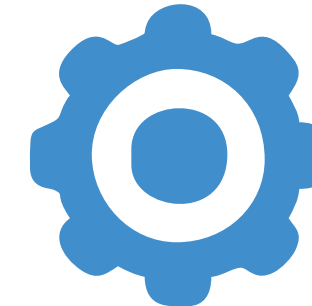

Managed Coding/Audit Solutions

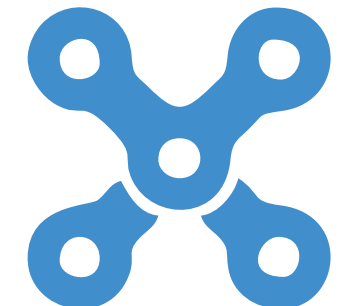

Customers demand SOLUTIONS that deliver significant ROI. ezDI is a master at this and offers comprehensive, end-to-end “Managed Coding/Audit Solutions”.

People

Processes

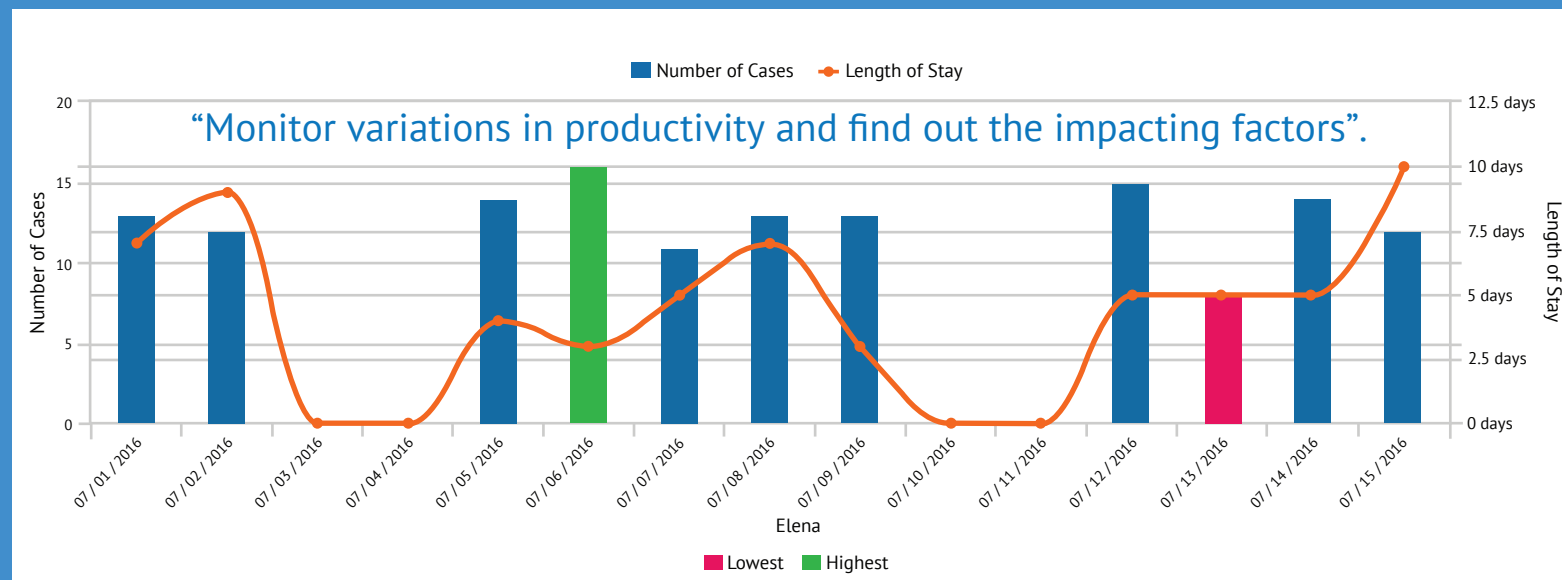

Systems

Managed Coding/Audit Solutions include:
