

Our components

Powerful machines need powerful brakes. We use Tektro hydraulic and mechanical brakes with 180mm and 160mm rotors on the front and rear wheels respectively.

High quality retro looking grips with baseball stitching and Shimano gear lever.

Powered by a reliable, tried and tested Bafang Rear Hub Drive Motor.

Dependable and long lasting Samsung 36v 13ah lithium ion battery.

Cockpit control is a Kingmeter SW-LCD display with key data such as; real time battery life, speed, distance, wattage and PAS zone.

Each bike is equipped with a retro looking front LED hard wired headlight and a solar charged rear light.

TAKE A RIDE

At Wildsyde™, we are avid outdoor enthusiasts who face it, like to have an easy cruise around town sometimes instead of grinding up the backside of a mountain. These vintage electric eCruisers have been tried, tested and designed with adventure at its core and practicality at its forefront.

Our Founding

Wildsyde™ was founded by Paul Hields, the President and Owner of Sportube™ products, the World's #1 Hard Sided Ski, Snowboard and Fishing Travel Cases. He's been in the biz for 25+ years and knows how to design (and use) great products. Paul has been a passionate biker since he could first pedal around as a kid and continued throughout his life into road biking, mountain biking, and now; Vintage eCruisers.

Paul and his wife, Margo, routinely bike together in Colorado, Michigan, and even Europe, however, because of health issues (Margo had a heart transplant 25 years ago), she was never able to keep up! This is when Paul realized the beauty of the E-bike; it has not only helped Margo continue to bike with him but it has allowed them to run simple errands or go grab a beer in style without having to drive their car! Which brings us to the founding and future of Wildsyde™, the Vintage eCruisers.

The Shift to Adventure

The monotony and grind of everyday life and routine can become taxing. We understand that, so the team at Wildsyde has chosen to focus our energy on creating new experiences, making new memories and combating the everyday "design" that we as a society have shaped. We choose to opt outside, spend time with our family, our friends and our loved ones. We travel, explore, take on new challenges and aim to shake up the game. We are pursuing a dream.

The Shift to Practicality

Why drive to work when you could bike instead? At Wildsyde, we strive to create a new innovative and stylish commuting option. Whether heading to work, the brewery, your favorite restaurant, friends' house, or the gym our vintage eCruisers can get you there in a timely and fashionable manner. Perhaps you are interested in a beach cruise, a city cruise, a cruise through the country side or even better yet, the wine country side. Wherever your travels and adventures take you, we want to be a part of your journey along the way.

Take a Ride on the Wildsyde!™

Black Gloss

The Beast

Originally designed with snow and sand in mind, the fat tire bike is versatile on all terrains. We have taken this idea and made it even more bad*ss; by adding a powerful motor to get you going and hydraulic brakes to slow you down. Take a ride on the Beast™ and you'll maneuver around town and commute to work, all while turning heads and making a statement. The Beast™ is a force to be reckoned with.

Blue Gloss

Shadow

Back to the days of classic vintage motorcycles, with its' double springer fork and integrated luggage rack, the Shadow™ epitomizes retro and oozes coolness. With narrower tires and rims, and a svelte frame, this slightly smaller yet equally powered bike will propel you with ease and panache for a beach cruise, bar cruise or an everyday cruise. You'll be sure to cast a shadow that won't be missed!

Baby Blue

Hunni Bunni

This baby really is a Wolf in Sheep's Clothing. Don't be fooled by the beauty of this bike, she sure can rip it just like one of the boys! Built to the same specs as our Shadow™ eCruiser with a 500wh motor, Samsung 36v 13ah battery and hydraulic brakes, The Hunni Bunni™ has the power of a beast but the looks of a queen. Dress her up with a basket and saddle bag, and you'll be the prettiest girl at the ball with a carriage fast enough to dump your date.

Brakes:
Tekrto mechanical disc; 180mm front, 160mm rear

Matte Grey/Neon

Son of the Beast

Bred from the same lineage as The Beast™, the entry level Son of the Beast™ has a slightly lighter frame, narrower rims, and a 250W motor and battery. With knobby off-road tires for the days when the roads aren't quite as smooth as we like, this little SOB will be sure to pack a punch and get any adult or big kid to their destination quick and in style. With the addition of a handlebar throttle this bike allows one to get up to speed quickly when needed. The apple doesn't fall far from the tree!
