24/Seven® ESD LockSafe®

POSITIVE INTERLOCKING TILES WITH ESD PROTECTION!

Static electricity produces damaging sparks that can ruin and destroy expensive equipment. 24/Seven ESD LockSafe eliminates static, while providing an ergonomic worksurface for your team to perform. Made to cover large areas quickly, the 770 ESD can be placed directly atop a conductive coating or floor, eliminating the need for messy grounding cords. The 'positive interlock' technology allows the rubber tiles to lock-in, while remaining easy to 'unzip' for reconfiguration. The LockSafe connection also allows the assembled mats to be rolled up, making cleaning a breeze.
