

LAUNCHING THE SOLUTIONS MOVEMENT

Student Energy is the leading global organization empowering the next generation of leaders who are accelerating the transition to a sustainable, equitable energy future.

We work with a network of over **50,000 young people from over 120 countries** to build the knowledge, skills, and networks they need to take action on energy. Student Energy collaborates with governments, companies, and organizations to facilitate meaningful youth engagement and mobilize resources to support youth-led energy solutions.

OUR MISSION: EMPOWERING YOUTH FOR ENERGY SYSTEM CHANGE

Student Energy empowers young people aged 18-30 to accelerate the sustainable energy transition. We do this through meaningful youth engagement programming, including our global network of nearly 50 university-based Chapters, a digital Energy System Map, and the largest student-led energy conference in the world.

Student Energy operates on a unique youth empowerment model that creates opportunities for youth to engage in decision-making spaces and to implement tangible energy solutions in their communities.

Youth Energy Projects Developed

BRIDGING THE GAP BETWEEN MOTIVATION AND ACTION:

Young people are driven to implement climate solutions but lack the resources and know-how to deploy them at the scale and speed needed. In 2021, Student Energy is seeking \$10 million to develop and deploy the missing components needed to unlock youth climate solutions this decade.

Representing the biggest fundraising push in Student Energy’s history, the “Solutions Movement” campaign will scale our existing program ecosystem to meet demand, and unlock never before seen direct-to-youth project funding through Student Energy Ventures-- a missing ingredient to empowering youth to influence local energy systems.

50%

of Global Youth have never been asked their opinion on the future of energy by a government or organization

Addressed by
Global Youth Energy Outlook

82%

of Young Entrepreneurs indicated that a lack of financial support is the main barrier to making entrepreneurship feasible

Addressed by
Ventures

74%

of Global Youth do not have a clear idea of how they can contribute to solving climate change

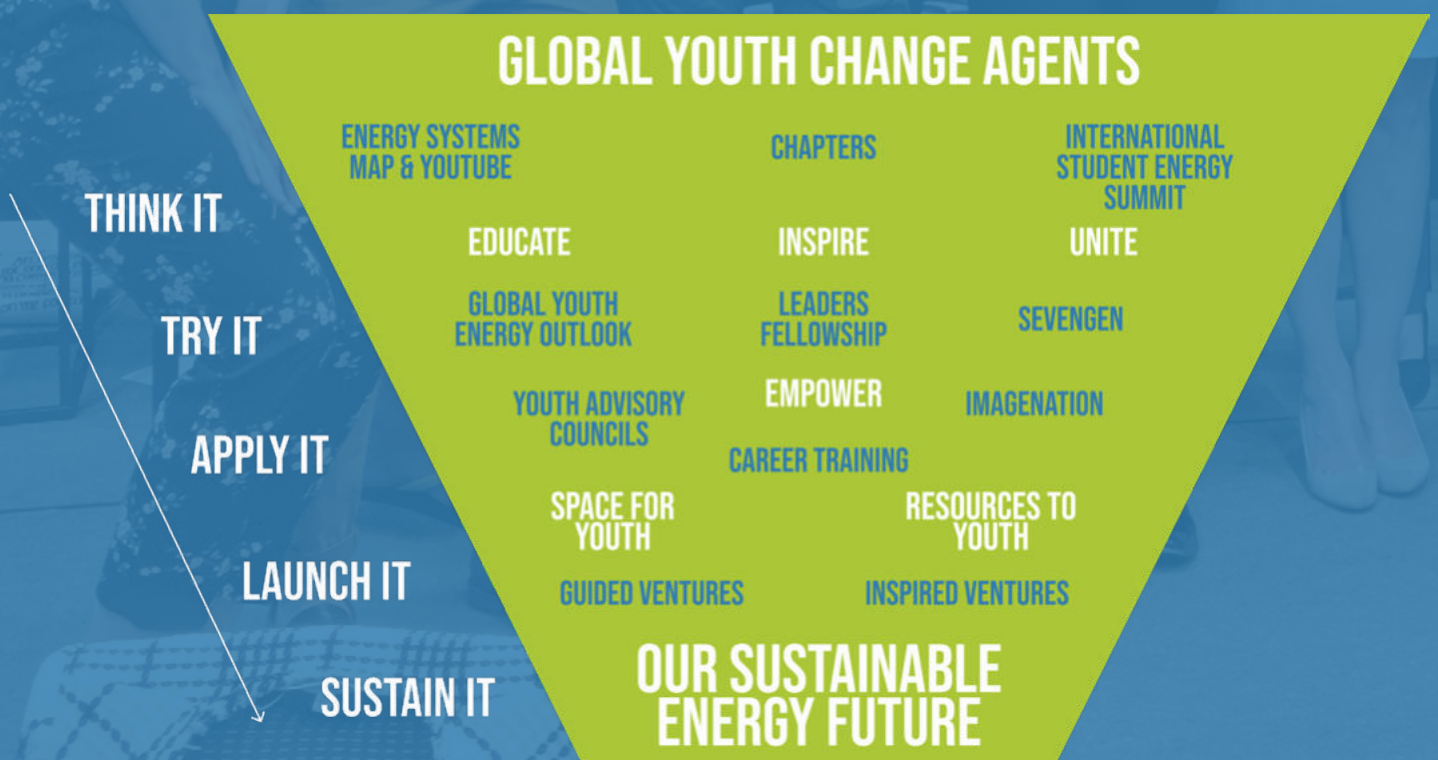

Addressed by
Leaders Fellowship & Chapters

Only **\$45B of \$455B**

of Global Climate Finance crossed borders from OECD to non-OECD countries, mostly in the form of loans

Addressed by
Capital Campaign

Student Energy’s programs ecosystem gets young people interested in energy, connected to a global community of peers and mentors, and teaches the tangible skills needed to start and deliver on projects. Our programs are carefully designed to each deliver a unique set of in-demand skills and experience, but are also interconnected, to provide multiple pathways for youth to build their skills to implement energy projects, enter energy careers as multi-skilled innovators, and create effective partnerships for local and global impact.

STUDENT ENERGY VENTURES

Student Energy Ventures will serve as a flagship program for launching the Solutions Movement. Ventures will develop a high-volume pipeline of easily scalable, templated clean energy projects (called “Guided Ventures”) that can be adapted to numerous local contexts. Ventures will also support innovative entrepreneurial projects and the formation of new companies that fill unique needs in the energy transition (called “Inspired Ventures”).
