

No Batteries - No Limits

- Fly ALL day up to 200'
- Ground Powered or Vehicle Mounted
- Built-in Lead, Flank, Follow Technology
- Simple 5-Button Operation
- PTZ Hi-Def Camera w/10X Zoom Joystick
- 90 Min. Training (including lunch)
- Integrates Securely with your VMS
- * **NOW AMAG CERTIFIED**

LIVE SKY[™]

Infinite Power When It's A Matter of Life, Safety & Security

Continuous Observation When It Matters Most

In the last few years, drones have become increasingly popular as a security and public safety tool. The universal problem that current drone systems present to security providers is their short battery life. Hoverfly's technology, made right here in the USA, pairs our state-of-the-art drone hardware with tethered power over a cable up to 200'. This means you can fly aerial surveillance and monitoring missions unconstrained for indefinite periods, meeting your needs in real world conditions.

Made in the USA
