

SpinSys-Diné Secures Contract to Support DHA Enterprise Data Solutions

Scottsdale, Arizona – September 30, 2024 – SpinSys-Diné, a subsidiary of Diné Development Corporation (DDC) and leader in cloud-based sustainment and modernization, has been awarded the Enterprise Information Data Solutions (EIDS) Program Management Office (PMO) contract. This award reflects SpinSys-Diné’s proven history of enterprise healthcare data solutions, reinforcing its long-standing support of the Defense Health Agency (DHA).

SpinSys-Diné builds on its partnership with the agency to advance integration and interoperability of enterprise health IT systems across global Military Treatment Facilities (MTF). In support of the EIDS PMO, the company will deliver programmatic, engineering, and cybersecurity expertise to support cloud-based solutions, virtual technologies, business intelligence, and data delivery.

“We’re proud to build on our valued partnership with the DHA to support health system optimization and modernization,” stated Shourya Ray, SpinSys-Diné President. “This award reflects our dedication to innovation in support of the agency’s cloud-based enterprise data services.”

SpinSys-Diné’s team of specialists will leverage expertise in data solutions, data science, and operations to deliver innovative mission support for the PMO, enhancing health IT data availability and reliability with a focus on elevating clinical decision making.

“This contract marks another key milestone for our team committed to the DHA mission,” commented Jamie Dahlum, Vice President of Growth and Strategy, Health IT. “We look forward to expanding our support to improve healthcare and ensure the readiness of military personnel.”

About DDC

Since 2004, DDC’s family of companies has powered government missions through an unwavering dedication to our clients and communities we serve. Our innovation-driven IT practice, specializing in cloud, cyber, data management, and enterprise IT solutions, has delivered lasting value to defense and civilian agencies across the world. Central to DDC’s mission is its commitment to advance the Navajo Nation and its People to inspire change for future generations.

About SpinSys-Diné

SpinSys-Diné offers integration and interoperability by providing cloud-based sustainment and modernization services for government clients. As a leading small business specializing in data transformation, we streamline business processes through cloud deployment across enterprises. Our team harnesses the power of business intelligence to enable informed decision making.
