- Generate Additional Revenue, Improve Outcomes
- Multimedia Access to Patient Specific Care Plans
- Interdisciplinary Clinical Team
- 24 / 7 / 365 Patient Access to Care
- Prescriptive Educational Support
- Seamless Integration with EHR
- Ensures Compliance with CMS Policy

## Make the most of Medicare's new reimbursement for Chronic Care Management.

Veritas can augment your practice by providing complete chronic care management services which meet all CMS requirements to allow for billing and reimbursement. Veritas has an established interdisciplinary team of clinical mentors who are readily and immediately available for you to utilize in order to receive the maximum benefit with immediate results. By using your own established electronic health record, Veritas can extract standard CCDA clinical summary data as the foundation needed to develop customized patient care plans meeting the policy criteria set forth by Medicare. Start driving an increase in your revenue stream and stay on top of your attribution to ensure optimal patient wellness.

- Clinical** - Chronic Care Management is conducted by an interdisciplinary clinical team consisting of physicians, nurses, pharmacists, therapists, dietitians and social workers. Not a call center.
- Customizable** - vSolutions is customized to meet the needs of the patient, chronic care guidelines and organizational needs such as that of an ACOs, PCMH, Hospital or Payer.
- Scalable** - Our service can be scaled to address your entire population or a select group of patients, through all transitions of care - for example, those requiring chronic care management.
- Engagement** - Electronic care plan deployable via our interactive mobile application with access for both patients and caregivers, including medication tasking, reminders and prescriptive educational materials.
- Communication** - Our platform allows for telephonic, IVR, e-mail and text messaging capabilities in order to ensure convenient and streamlined patient access to the care plan.
- Affordable** - Utilizing Veritas for your Chronic Care Management needs will provide your practice additional income streams back to the practice and improve patient outcomes.

Veritas helps organizations meet value based metrics, maximize incentive payments and reimbursements, minimize penalties and improve quality of care. Our service, vSolutions, is a customizable service consisting of a powerful technology platform to identify patient needs, an experienced interdisciplinary clinical team to act upon identified needs and an array of engagement tools designed to make patients stakeholders in their own wellness.
