Uncovering Health Issues in Your Patients

ADD/ADHD	Snoring	Bed Wetting
Mouth Breathing	Nightmares	Difficulty in School
Restless Sleep	Dark Circles Under Eyes	Sleep Issues
Daytime Drowsiness	Defiance / Aggression	Chronic Allergies

While Promoting Beautiful Straight Teeth

The Healthy Start System is Designed to Address:

- Symptoms for Sleep Disordered Breathing
- Development of the Dentition
- Development of the Jaws and Facial Profile
- Opens up the Airway
- Straightening of the Teeth
- Facilitating Dental Arch Expansion
- Correcting the Tongue Thrust
- Positioning and Training the Tongue for Proper Tongue Placement
- Teaching Proper Swallowing
- Promoting Nasal Breathing
- Eliminating Oral Habits such as Thumb or Finger Sucking
- Correcting Overbite, Overjet, Crowding, and Cross-Bites

Comprehensive Presentation and Hands-On Clinical Training

- Classroom and hands-on training
- Course fee covers admission for key staff members or entire staff
- 2 Days of CE accredited training

When you attend the new provider course, participants will understand Sleep Disorder Breathing, its symptoms, the root cause, and treatment with the Healthy Start system that will address health issues while straightening the teeth. Diagnostic criteria and treatment process will be covered. Staff is encouraged to attend to further discuss the office procedures needed to educate and examine these young children. A 2-day clinical training course will include a hands on live patients training on the **2nd** day. We encourage participants to bring their own patients for a clinical evaluation and new outside patients will also participate in this day to determine, evaluate, and put a treatment plan for the Healthy Start System. These new patients will then choose a local provider for continued treatment, so participants walk away with new patients. This **2nd** day offers participants to put the educational training into practice.

Friday Lecture
8:00 a.m. - 5:00 p.m.

Saturday Lecture
8:00 a.m. - 2:30 p.m.

Saturday Clinical Day
