**The EPP-3X-15A from Larson Electronics is an Explosion Proof Plug with Tri-Tap Receptacle that is designed for heavy duty and outdoor applications. This rugged extension cord is constructed of six inches of 12-gauge 3-conductor wire, equipped with a 15-amp rated explosion proof 5-15 male cord cap and features a tri-tap receptacle for powering a variety of general use devices.**

The EPP-3X-15A linecord provides a safe and effective way for operators to power a variety of general use devices within a hazardous location with a hot permit. The EPP-3X-15A consists of 6" of chemical and abrasion resistant flexible 12/3 SOOW cord that is terminated in a male NEMA 5-15, 15 amp rated, explosion proof cord cap. A tri-tap receptacle allows operators to connect up to three devices.

**Hot Work Permit:** This line cord is approved for hot work permit applications and allows operators to use their non-explosion proof equipment within an explosion proof environment. The alternative to this line cord is to convert non-explosion proof equipment to explosion proof plugs which can quickly become prohibitively expensive. Having the ability to use non-explosion proof equipment within hazardous areas when a job requires it makes this line cord able to greatly increase the versatility of non-explosion proof equipment. These industrial line cords are popularly used in hazardous locations when hot work permits have been acquired. We also offer class rated extension cords for use within explosion proof and hazardous location environments without hot work permits.

**Suggested Applications:** This GFCI protected linecord system is ideal for indoor or outdoor use and applications including but not limited to aircraft maintenance, alcohol processing, aerospace, chemical manufacturing, coke processing, cold storage, compressed natural gas (CNG) facilities, cranes, cryogenics, distilleries, food processing, fuel storage, gas processing plants, grain processing, laboratories, liquefied natural gas (LNG) facilities, liquid propane gas (LPG), manufacturing, marine vessels, methane production, mining, offshore, oil drilling rigs, oil refineries, paint spray booths, paper processing, petrochemical, pharmaceuticals, power plants, production refineries, sand blast cabinets, sewage and septic tanks, shipyards, solvent and cleaning areas, storage facilities, tank farms, tankers, textile, washdown areas, waste treatment plants, and woodworking. These industrial extensor cords are popularly used in hazardous locations when hot work permits have been acquired. We also offer class rated extension cords for use within explosion proof and hazardous location environments without hot work permits.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message [2sales@larsonelectronics.com](mailto:sales@larsonelectronics.com) for more information about our custom options tailored to meet your specific industry needs.
