Key Benefits

Gain visibility

Our compliance plan provides clients with a complete picture of their compliance obligations and related actions to reduce the risks of a non-compliance event. Align people, processes, and technology for streamlined and consolidated information so you can gain actionable insights across your organization to improve operational performance.

Ensure compliance

Designed to help you streamline, standardize, and improve compliance management to ensure a closed-loop compliance plan in a single, configurable, and unified platform. Our EHS solution supports a 'management systems' approach to improve management and operations for regulations, permits, international standards (ISO 14001, 45001, and 31001, OHSAS 18001, ANSI Z10), and company policies in one system.

Drive improvement

Cority's powerful reporting capabilities turn strategic and operational objectives into measurable success indicators to determine the effectiveness of your Operational Excellence program. Our approach enables collaboration across different business units so you gain a holistic view of operations to drive faster alignment on key issues, reduce waste and costs.

Key Solutions

Air Emissions Management

Provides environmental professionals a comprehensive set of tools to make reporting to agencies on hazardous air pollutants, greenhouse gases, and ozone depleting substances easier and to help ensure compliance with global regulations and legislation.

Waste Management

A market-leading solution for tracking waste generation, storage and disposal of hazardous, universal, and special wastes and can also be used to collect municipal solid waste (MSW) recyclables data. Demonstrably reduce costs and improve compliance through automation.

Water Management

Manages analytical data from sampling, tracks permitted discharges from operations, ensures compliance with permit conditions and limits, and calculates wastewater and stormwater discharges for each facility.

Chemical Management

Manage the lifecycle of your chemicals, from approving chemicals being brought onsite, to managing your chemical inventory, and storing safety data sheets and related documents.

Compliance

Leverage advanced features and integrations with external content providers to take the worry out of maintaining compliance to any regulatory standard or corporate requirement applicable to your business.

Incident Management

Empower any employee to easily record and report events from any device. Once captured, leverage advanced EHS software tools to optimize your investigations: identify root causes, assign and track actions, share learnings and ensure prompt notifications through the entire chain-of-command.

Sustainability & ESG

A holistic approach to reliably report your carbon footprint in your sustainability and ESG reports with accurate greenhouse gas emissions and other sustainability metrics. From accelerating calculations and reporting to streamlining processes to reduce costs for better operational efficiencies.

Management of Change

A user-friendly EHS solution ensures the risks associated with any business change are thoroughly yet efficiently reviewed and mitigated before the change occurs, preventing unexpected delays or surprise costs.

Audits & Inspections

Developed by health and safety professionals, Cority's Audits & Inspections solution helps manage all aspects of health and safety auditing, including scheduling, reporting, and managing associated corrective actions.

Risk

One comprehensive EHS solution to simplify, standardize, and streamline risk assessment practices to provide leaders with greater real-time visibility on where risk exists within the business, enabling prioritized efforts and resources to keep people safe and your organization on a clear path towards excellence.

Document Control

Secure, fast, and efficient documentation access to all stakeholders locally or globally with minimum administrative overhead and maximum control.
