

UNLOCKING THE POTENTIAL OF SOLAR FOR NONPROFITS

Collective PACE™

Collective PACE™ combines the financing models of solar leasing and state-legislated C-PACE programs to unlock the potential of solar power by capturing tax credits and providing financing terms that allow for positive cash flow from day one.

Designed for nonprofits

The economics of solar are not as attractive for institutions that cannot monetize solar tax credits and benefits. Collective PACE™ delivers this value to nonprofits through a 15% discount off the solar system price in exchange for ownership and operation of the system with guaranteed solar performance for the non-profit.

Nonprofits leverage the ownership of their properties to secure affordable long-term financing through C-PACE to cover the balance of system cost.

Access full value of solar with **100%** funding

- 15% buy down of project cost via upfront monetization of solar tax credit
- 85% remaining financed via C-PACE
- 3rd party ownership and guaranteed system performance
- Ownership option after 6 years

Zero cash out of pocket
