VIZZIA
Real-Time Healthcare Visibility

DRIVEN BY A VISION TO IMPROVE HEALTHCARE

Vizzia Technologies is a recognized leader of advanced real-time location systems (RTLS) and data analytics for healthcare organizations. Vizzia is an award-winning managed service provider (MSP), deploying and maintaining clinical workflow technologies.

Its innovative InVIEW℠ software platform provides real-time, actionable data and process visibility to improve enterprise efficiencies and patient care.

Vizzia serves several of the largest and "most wired" hospitals in America, designated by Becker's Hospital Review and the College of Healthcare Information Management Executives (CHIME).

100% FOCUS ON ENTERPRISE ACUTE CARE

Larger hospitals and healthcare networks are faced with an enormous management challenge to improve efficiencies and reduce costs while providing exceptional patient care. Vizzia's innovative and fully managed RTLS solutions help healthcare executives and clinicians manage these growing challenges.

ASSET MANAGEMENT

Tracking and management of medical equipment enables staff to find available assets, recover missing equipment, reduce dependency on rentals, and perform maintenance efficiently.

STAFF SAFETY

For staff workflow, RTLS can automate nurse call cancellation, rounding schedules, and help summon urgent assistance to support patient care. In emergency situations, duress systems provide vital rapid location tracking and alerting.

HAND HYGIENE

Maintaining proper hand hygiene is crucial to reduce infection risks within healthcare facilities. Vizzia offers solutions capable of detecting staff members' handwashing or sanitizer usage.

ENVIRONMENTAL MONITORING

RTLS and IoT sensors can remotely monitor temperature, humidity and air quality to protect patients, critical medications, lab samples and blood banks to ensure optimal patient safety and care.

PATIENT WORKFLOW

RTLS can optimize patient workflow management and enhance patient safety. Healthcare providers can monitor patient movement, prevent wandering, and enhance infant security within the facility.

PATIENT WAYFINDING

IoT-enabled solutions simplify navigation within healthcare facilities, helping patients and visitors find their way efficiently using interactive mapping to guide individuals to their desired destinations.

AWARDS & RECOGNITION

The Healthcare Technology Report — Top 25 Healthcare Software Companies 2024

America's Fastest-Growing Private Companies — Inc. 5000

Vizzia Technologies Receives 2023 RTLS Company of the Year Award
