ZAPTEST

Any Software Cross Platform

CA technologies Agile Central (formerly Rally)

Integration

ABOUT ZAPTEST

ZAPTEST enables test automation using application mockups, allowing Agile/DevOps teams to perform Shift-Left testing on the early stages of SDLC and to be test ready just in time.

OUR SOLUTIONS

ZAPTEST allows users to automate testing of any application and execute cross-platform on multiple workstations and mobile devices at once. ZAPTEST solutions are oriented to test optimization and reducing the organizations overall investment in software testing and increasing testing ROI, offering less time for development and maintenance of test artifacts as well as allowing testing teams to start test automation early in thedevelopment cycle.
