Press Release: StraVis Enterprize Solutions and Neptune Software enter into Partnership

StraVis Enterprize Solutions and Neptune Software have entered into a partnership to provide revolutionary user experience (UX) and mobility solutions to SAP Customers.

Chicago, IL, February 3, 2016 – 1st StraVis Enterprize Solutions and Neptune Software have entered into a partnership to provide revolutionary user experience (UX) and mobility solutions to SAP Customers. Neptune Software's UX solution is based on UI5/Fiori on the front end, however, is driven entirely by SAP's own source code (ABAP) on the backend, which is a key differentiator. This allows StraVis' team of highly experienced developers to leverage their experience in order to provide cutting edge applications for their customers.

StraVis IT Solutions is a Business Consulting and Information Technology Services Provider focusing on the Digital Business Transformation and implementation of Integrated Business Systems, with specialization in SAP applications and technology. The company provides functional and process design expertise in Supply Chain Management, Customer Relationship Management, Financial Operations and Human Capital Management.

"StraVis has enormous expertise in SAP, both technically and functionally, as they have been working exclusively with SAP since 2010. Neptune Software strives to align itself with high quality partners like StraVis Enterprize Solutions," said **Martin Beringer, Managing Director, Neptune Software**. "We are looking forward to a long, mutually beneficial relationship."

"Stravis Enterprize Solutions is excited to work with Neptune Software. This partnership allows its customers to maximize the use of their SAP system and minimize the need for integration using Fiori® UX apps with ABAP® and Neptune Software." said **Ram Rishi, President & Global CEO, StraVis Enterprize Solutions**

Neptune Software provides the most cost-effective and secure way to make any SAP functionality seamlessly available on phone, tablet and desktop. "Being the only solution on the market that directly leverages SAP's own source code, we maximize the use of the customer's existing SAP set-up, while minimizing the need for integration," Beringer said. "The Neptune Platform covers the complete application lifecycle from design through deployment, as well as managing the application."

About StraVis IT Solutions:

StraVis IT Solutions is a Business Consulting and Information Technology Services Provider focusing on the Digital Business Transformation and implementation of Integrated Business Systems, with specialization in SAP applications and technology. We are engaged by the customers due to our ability to easily understand the business processes and technology with relative ease in different industry segments. We are CMMI Level 3, ISO 9001:2008 and ISO 27001:2013 certified company.
