

# ADVEEZ WATCH TAG

Time for a new wrist tag.

## Then...

- Current wander management products are stigmatized as unattractive monitoring systems.
- Misdetections, inconsistent operation, "Will it work today?" performance.
- Complex systems have higher costs.
- Technology is getting in the way of resident care.

## Now...

- The Advееz Watch Tag is a working digital watch with wander management electronics inside.
- We could talk about our advanced detection technology, but the proof is with our satisfied customers.
- This best technology doesn't have to come with the high price. Our wander management system is simple and easy to set up, which reduces cost.
- Our wander management system is easy to use and maintain - it only requires minimal interaction from staff.

# Important Features

## **Hands-free technology**

---

- True 3D detection of tags – not affected by orientation or location on body
- Accurate, consistent detection
- Adjustable detection range 4-12ft
- Optional external antenna extends detection area or suppresses detection in unwanted areas.
- Replaceable Battery – est. 2-3yr life

## **System Capabilities**

---

- Wander Management & Secure Access in one system.
- Staff uses one credential for all functions: alarm reset, escort, and access.
- Hands-free tags allows staff to use both hands when escorting wander residents and minimizes interaction with system.
- No software license fees
- Wireless door controller network makes installation, future expansion and upgrading very easy.
- System is fully-featured out of the box.
- Automatic notification of system activity (customizable) via e-mail.
- Tag & Door Tester available to provide additional check and reports of tag battery status and door functions.
