# Why *Topre* ?

---

We Help Be the Best You Can Be.

We've been dedicated to advancing industrial technologies since 1935. Over the past 33 years, we noticed that our long hours of research, communication, and execution have been spent almost entirely at a keyboard.

**So we designed a key switch that fought fatigue, but also felt satisfying to the touch.**

Through our reputation for comfort and a luxurious tactile feel, keyboards with Topre switches have become the **premium choice** for keyboard enthusiasts and data entry professionals.

*“Topre [switches] feel great, very subtle and “velvet like”... after you give them some time **you won't want to type on anything else.**”*

**Geekhack.org Forum Thread**  
**“What Is So Special About Topre?”**

# Enter REALFORCE

Elite Gamers Require Elite Gear.

The REALFORCE RGB Premium Gaming Keyboard combines the comfort of fatigue free switches with enhanced features gamers need to play their best.

- **Premium *Topre* Key Switches**
- **RGB Per-Key Backlighting**
- **Actuation Point Changer – EXCLUSIVE**
- **Keycap Compatibility Stem**
- **NKRO & Anti-Ghosting**
- **Software Control**
- **Made in Japan – Highest Quality Standard**

## Created From Shared Experiences

eSports and competitive gaming requires long hours of **researching, communicating, and practicing** to be the best. We've been there before, so we're here to help.

# Topre Switches

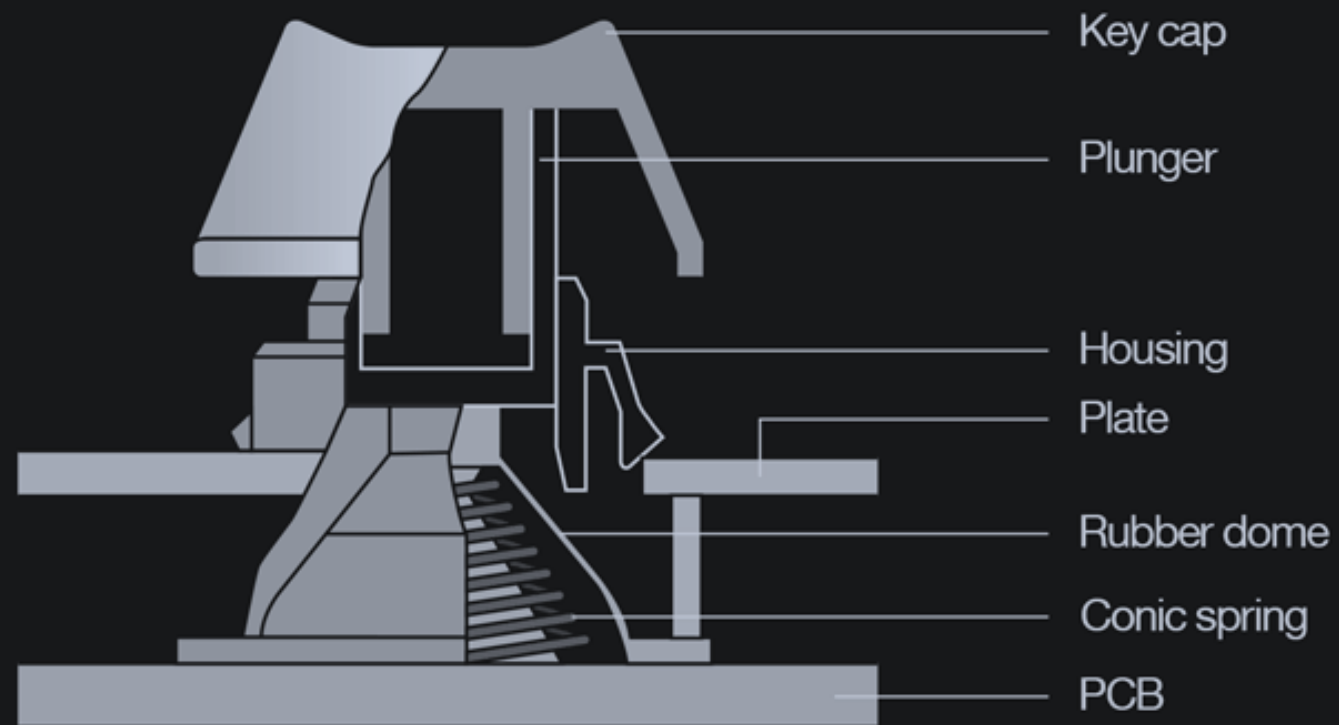

Precision Tuned. Premium Grade.

The REALFORCE RGB utilizes a patented switch design that gives gamers the luxurious **tactility and comfort** they need for long gaming sessions.

- **Premium key feel and tactile response**
- **NKRO and anti-ghosting**
- **Conquers finger fatigue**
- **Quieter than mechanical keyboards**

## Maximize Moves with Minimal Effort

*The satisfying tactile response lets you float your fingers effortlessly.*

# APC

## Actuation Point Changer

APC gives you the power to choose key sensitivity to maximize your Actions-Per-Minute (APM) like never before.

- **Exclusive to REALFORCE RGB**
- **Achieve higher APM to compete at the highest levels**
- **Individual key settings for total control and comfort**

## What is APM?

Actions-Per-Minute (APM) is a metric used by professional gamers to associate with agility.

A diagram of a keycap with three callout boxes pointing to different heights. The top callout is blue and labeled '1.5 mm' with the text 'Double-tapping, FPS, RTS'. The middle callout is purple and labeled '2.2 mm' with the text 'Standard Actuation'. The bottom callout is pink and labeled '3 mm' with the text 'Critical Keys / Typing'.

**25% Faster\* APM**  
than mechanical keyboards

\*with 1.5mm APC setting

Set keys for **lighting fast response** or **secure critical actions** when you need it in the heat of battle.

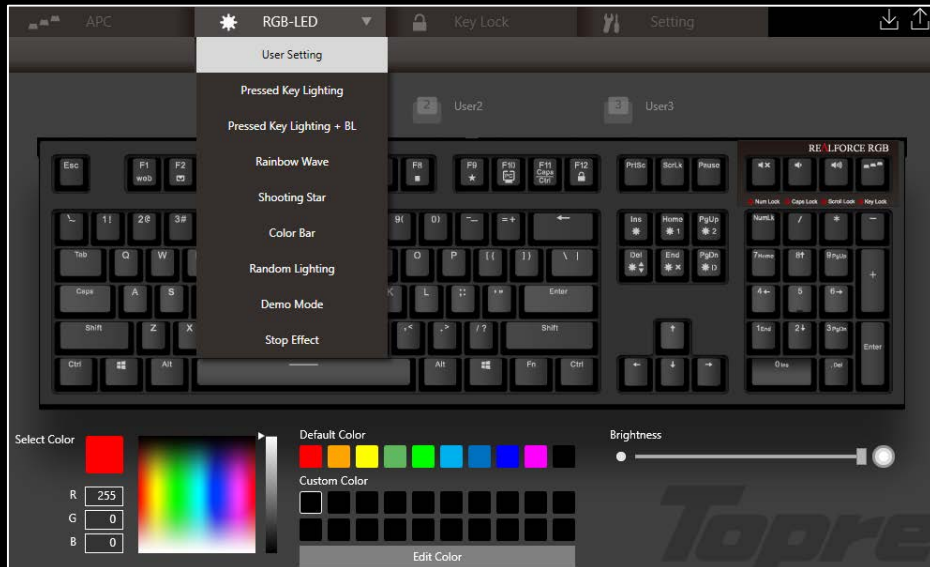

# RGB LIGHTING

Illuminate Your Playstyle

Use REALFORCE software to personalize your style.
