

FOR IMMEDIATE RELEASE:

AvPORTS Secures Flights to Chicago for the Youngstown-Warren Regional Airport

New flights make Youngstown the first U.S. airport in two years to re-establish daily connecting hub service

DULLES, VA – (June 1, 2016) Aerodynamics Inc. (ADI) began selling tickets today for its new daily nonstop service between Chicago O'Hare International Airport (ORD) and the Youngstown-Warren Regional Airport (YNG). Service will start July 1, 2016 and flights will operate in partnership with Great Lakes Airlines, enabling interline connections with other airlines at O'Hare and seamless connections to over 100 destinations. Flight schedules will allow for same day travel to Chicago for Youngstown travelers and will operate twice daily in each direction on Monday, Thursday & Friday and once daily on Tuesday, Wednesday, Saturday & Sunday.

As the long standing air service development consultant to the Youngstown-Warren Regional Airport, AvPORTS provided the airport and Aerodynamics Inc. with analytical support, guidance, and the strategic planning necessary to broker the arrangement and bring this air service to fruition. "By assisting the Youngstown-Warren Regional Airport to re-establish daily hub air service at a time when successes like this are extremely rare, AvPORTS has demonstrated how we can leverage our advanced air service development platform to the benefit of our clients", said Tom Reich, Director of Air Service Development of AvPORTS. "Securing this new air service is a big win for Youngstown and the entire Mahoning Valley. We at AvPORTS are honored to have been able to work collaboratively with the Youngstown-Warren Regional Airport and Aerodynamics Inc. to develop this new air service for the travelers of the Mahoning Valley", said Ozzie Moore, President and CEO of AvPORTS.
