MAXIMUM COMFORT AND STABLE HOLD

The padded palm rests offer maximum comfort and the side cushions with a very pleasant fluffy material grant a stable hold. The Couchmaster® CYPINK comes with a large mouse pad, which is of course replaceable. It is suitable for use on the couch or even in bed.

AN ACCESSORY WITH MANY POSSIBILITIES

The Couchmaster® CYPINK is the all-rounder among couch desks and offers many comfort functions. With its extra pocket for the power supply as well as a side pocket for accessories, it keeps things tidy. To ensure that the mouse doesn't get lost and is always protected when not in use, Couchmaster® CYPINK has a practical mouse pocket as well as an innovative plug-in system for attaching additional accessories in the future. A tablet holder including an adapter for all common tablet sizes rounds out the user experience.

GOOD FOR NOTEBOOKS AND GOOD FOR THE ENVIRONMENT

As we do not only care about our users but also about our environment, we manufacture the Couchmaster® CYPINK from sustainable materials. The renewable bamboo gives the Couchmaster® a feather-light weight.

PERFECTLY ERGONOMIC

From an ergonomic point of view, the Couchmaster® CYPINK is particularly recommendable. Physiotherapist Roland Kellerbach from Cologne-Germany comments: "From a health point of view, I can say that the Couchmaster® offers the best ergonomic way to use your PC/laptop from the couch. The wide cushions relieve the shoulder and neck muscles during use, which effectively prevents tension."
