

## Press Release WMD

### **WMD to Exhibit at Financials 2015 in Nice, France**

**Ahrensburg, May 2015 – WMD is exhibitor of SAPinsider’s Financials 2015 conference at the Nice Acropolis Convention Center, June 16-18. At the event, WMD Scandinavia will show WMD xSuite®, a solution portfolio for document management, on booth #210.**

Financials 2015 provides comprehensive education and networking opportunities for professionals, who use, evaluate, deploy, and support SAP functionality for financial accounting, control, planning, consolidation, closings, and reporting. On booth #210, WMD will present the WMD xSuite product family, an SAP-certified integrated concept for standardized end-to-end solutions in SAP. Numerous well-known globally operating companies use the solution to improve and accelerate their SAP-integrated processes. WMD (Workflow Management & Document Consulting) is an SAP Software Solution and Technology Partner and one of the leading German software developing companies in the area of workflow and document management.

At Financials 2015, visitors can learn all about xSuite for SAP and xSuite ECM. The WMD xSuite for SAP is a generic solution based on the SAP standard that automatically maps document-based processes to SAP. The foundation is a workflow system (xFlow) with an engine that can operate different applications in an organization. The xSuite for SAP comprises various modules for individual areas of application, which can be connected to form continuous processes such as Procure to Pay (ordering and payment) or Order to Cash (orders and receipt of payment). xSuite ECM offers standardized solutions for cross-company process optimization that cater to any industry. One of the highlights at Financials to be shown will be the digital contract folder xFlow Contracts. With this WMD software, all documents relevant to the contract are linked to a digital contract folder that is centrally located and constantly accessible from any location.

SAPinsider, published by Wellesley Information Services, is the premier source of information on products, services, and strategic initiatives coming from SAP and its partners. More than 250,000 customers in 70 countries rely annually on education and training materials from Wellesley Information Services to optimise their investments in SAP solutions. #### **About WMD – Workflow Management and Document Consulting**

Founded in 1994 and managed by its owners, WMD has established itself firmly as a software developer and provider of market-leading ECM systems. WMD streamlines scanning, document processing, and archiving within and beyond SAP. WMD’s xSuite solution is developed in-house and delivers interfaces enabling easy integration in any environment. It covers compliant, workflow-supported invoicing and PO processing, management of digital personnel files and contracts, digital mailroom processing, email archiving, and other areas. WMD is presently expanding its classic on-premises solution portfolio to include services in the cloud.

As an SAP Software Solution and Technology Partner, WMD offers deep expertise in workflow and archiving. WMD’s xSuite 5.1 is “SAP Certified – Powered by SAP NetWeaver”.

WMD has optimized operations at SMEs and Fortune-500 companies globally in over 870 installations. Ongoing, mutually rewarding relationships with customers continue to lead to development of reliable software that

addresses real needs in operations from capture to archive. WMD delivers high-quality results across sectors with the full package: analysis, consulting, implementation, delivery of hardware and software components, training, and support.

Based in Germany, WMD has representative offices in Denmark, Benelux, England, Spain and Singapore and a multinational staff of 140 to serve its customers worldwide. In 2014, WMD had a total turnover of more than €24 million.
