

StraVis Enterprise Solutions announces EzyProcess – Process Manufacturing Solution on SAP S/4 HANA

Hyderabad, Telangana, India – July 24, 2017 – StraVis Enterprise Solutions, a provider of innovative consulting, technology and application services in the SAP space announced the launch of EzyProcess – Process Manufacturing Solution that runs on SAP S/4 HANA.

Built on SAP S/4 HANA and SAP Best Practices, EzyProcess offers speed to market for any process manufacturing business in implementing SAP S/4 HANA solution. EzyProcess Rapid Deployment Solution is developed for mid-sized process manufacturing companies in Chemical, bulk dugs and similar enterprises, with a revenue size of \$500M to \$1.5B. StraVis has extensive experience in implementing SAP solutions for process manufacturing enterprises and EzyProcess RDS was developed harvesting those experience and knowledge base. SAP Fiori user interface which is a part of this solution, provides all business roles in real time on compatible hand-held devices.

“Market is dramatically changing. No enterprise wants to spend ages in implementing SAP solution and SAP answer to such expectation was S/4 HANA Best Practices. IT Services providers market is a crucial juncture where customers’ demands true value proposition from the providers. StraVis answer to customer is Ezy range of products and RDS. While S/4 HANA Best Practices helps customers for speedier implementation, StraVis EzyProcess RDS helps customers in further savings of time and cost in implementation” said Srinivasan M K, Vice President, StraVis Enterprise Solutions. Srinivasan himself steered EzyProcess RDS development from StraVis.

EzyProcess covers key business processes in Procure to Pay, Order to Cash, Process Manufacturing, Record to report for financial accounting and Product cost management, Profitability management required for process manufacturing enterprises. EzyProcess is bundled with necessary accelerators and building blocks for reducing the deployment time by 20-30% and helps customers to stay within the budget, in addition to achieving speedier implementation. The market potential is perceived to be around \$5B in the next three years in North America alone.
