GOCOIN
SECURE DIGITAL PAYMENT GATEWAY

GoCoin Announces New Crypto Currency Adoptions

As a global leader in digital currency merchant processing, GoCoin announces their recent partnership with DASH as well as the implementation of Bitcoin Cash. "GoCoin was a pioneer offering Litecoin in addition to Bitcoin payments back in 2014," states Margot Ritcher, CEO. "GoCoin is again demonstrating our dedication to multi-currency support, extending our platform to provide customers with faster confirmation speeds and lower blockchain transaction fees."

Welcoming Bitcoin Cash and DASH signals continued growth and larger market opportunity for the Company.

> "GoCoin has been a long time leader in the adoption and processing of crypto currencies, Bitcoin Cash is the next logical step." — *Roger Ver, CEO, Bitcoin.com*

> "Multi-currency support has been a foundational part of GoCoin's DNA, and the addition of Bitcoin Cash is the logical next step in that vision. We are living in a multi-chain, multi-token, multi-network universe and GoCoin is very well-aligned with today's crypto currency and blockchain reality."
> — *Jeff Garzik, CEO and Co-Founder, Bloq, Inc.*

Today, the Company is striving toward continued expansion and crypto currency diversification in digital trade technologies, and plans to add additional currencies in the coming months.

About GoCoin

GoCoin is a crypto currency merchant gateway, that services international merchants in the travel, gaming and professional service industries. Since 2013, GoCoin has established themselves as an innovative blockchain gateway that provides complimentary sign-ups, low processing fees, simple integrations (compatible with most enterprise platforms and shopping carts), minimal transactional risks, one-on-one support, and convenient and flexible crypto or fiat payment options via USD, EUR, GBP or digital currencies. The platform can be installed as a plugin and allows customers to pay with the digital currency of their choice. GoCoin has processed over 500 million transactions to date.
