Wing Control Implements VistaQuote for Paperless RFQ and Quote management.

Ambry Hill Technologies announced today that Wing Control has implemented VistaQuote as their RFQ and Quote response platform to support their Aviation Spares and Repair Management business.

Designed to provide web and mobile access to manage RFQ's and Quote responses, VistaQuote allows the sales team at Wing Control to have a consolidated, digital view of all incoming RFQ's regardless of the marketplace or source of the request. RFQ's are captured in real-time removing the need for manual entry while speeding the quote response process. All quotes are captured and managed within VistaQuote in addition to being inserted into the existing business system.

"It was important to provide our team with a modern RFQ and Quoting platform that also supported our remote and at-home sales staff. We evaluated several solutions and chose VistaQuote based on the superior functionality, ease of use, and experienced team to assist with the implementation and on-going support." said Beida Casanova (President & COO)

About Wing Control:

With over 50 years of combined experience in the aviation industry, Wing Control has propelled itself to a leading product support hub for airlines, MRO's and industry suppliers. The company assists in areas such as, Aircraft and Engine Spares Support, OEM Distribution, Repair management, Consignment and AOG services.

Wing Control is committed to providing efficient and cost-effective service. Dedicated to establishing a foundation of trust and transparency with partners and airlines alike, their business model can be summarized in three words: integrity, versatility and reliability. Your priority is their responsibility.

With a strong presence in the US, and internationally, each component of their companies is positioned to satisfy your business's specific needs.
