

PRESS RELEASE

Introducing the Sacramento Dentistry Group's Valley Affiliates

Sacramento, CA — November 5, 2015 — The Sacramento Dentistry Group strives to provide quality, full-service dentistry that uses the latest in dental technology for the benefit of its patients. At the same time, their dentists strive to focus on the finer points of customer service, always making each client feel satisfied with the treatment they receive at all levels inside the practice. These same principles direct the dentists at their affiliate locations in the Sacramento Valley, including the Placerville Dental Group and the Yuba City Dentistry Group.

Dr. Brian Steele, DDS, is the primary dentist directing the activities and services at each of the three Sacramento Valley dental offices. His focus on best practices leads all three locations to offer both standard and new dental treatments that improve oral health and well-being. Some of these advantageous therapies include:

- [Invisalign](#) orthodontics,
- [Propel](#) therapy for speeding up orthodontic treatment,
- [Perio Protect](#) for treating gum disease,
- Pinhole surgery for treating gum recession,
- Dental solutions for sleep apnea,
- Sedation dentistry for patients with treatment anxiety.

All of these services are patient driven, since they are offered to improve client health and long-term satisfaction with dental treatment.

These dental treatments and others are available at the following locations:

The Sacramento Dentistry Group, located at 1105 E Street in downtown Sacramento. Here Dr. Steele is assisted by Dr. Marjorie Castro and others to offer convenient service for the many people frequenting and living near the state's capital. Contact this extended hours office at (916) 538-6900.

The [Placerville Dental Group](#), conveniently located at 699 Main St., Suite B, in Placerville. This practice was one of the first to offer Invisalign treatment in Placerville. Many patients appreciate the full-service available here, including dental implants and full-mouth restorations. Dr. Mucci works along with Dr. Steele and both can be contacted at (530) 295-8000.

The [Yuba City Dentistry Group](#), located at 1052 Live Oak Blvd. in Yuba City. Dr. Philip Cummings founded this site, and he continues to work with Dr. Steele to provide a full-service family dental office. Advanced technology proves to be affordable with their patient-oriented practice. Contact this site at (530) 671-4784.

For dental patients moving from any of the above cities to one of the others, they can experience a seamless transition from one office to the next, even continuing to work with Dr. Steele if they so choose. At all three locations, a trained staff looks forward to promoting healthy teeth and beautiful smiles.
