Cybersecurity
Packages

Our cybersecurity bundled offerings simplify cybersecurity and cost-effectively reduce the risk of a cyberattack.

Our cybersecurity bundled offerings are based on your cybersecurity maturity level and our experience reducing cybersecurity risk.

We created these packages to help you cost-effectively secure your organization from cybercriminals, while also meeting compliance objectives.

Packages

Cybersecurity Crawl Package

Our Cybersecurity Crawl Package is the perfect starter package for organizations that are not sure of their cybersecurity maturity level.

This package focuses on the 3 attack vectors: external, internal, and people.

Main Objective: Identify and rank order the vulnerabilities in your environment.

Services Included:
» External Black Box Penetration Testing
» Internal Vulnerability Assessment
» Phishing Exercise
» Wireless Penetration Test

Price Range: Starts at $7750

Pricing is based on the following factors: number of external facing systems, number of internal systems, number of wireless access points, and number of users.

Cybersecurity Walk Package

Our Cybersecurity Walk Package is the perfect package for organizations that have implemented a few cyber-security tools and want to validate their security.

This package focuses on the 3 attack vectors: external, internal, and people.

Main Objective: Identify and rank order the true cyber-security risk to your environment.

Services Included:
» External Black Box Penetration Testing
» Internal Black Box Penetration Testing
» Phishing Exercise
» Wireless Penetration Test
» Web Application Penetration Testing (Optional)

Price Range: Starts at $9750

Pricing is based on the following factors: number of external facing systems, number of internal systems, number of users, number of wireless access points, and web application information.

Cybersecurity Run Package

Our Cybersecurity Run Package is perfect for organizations that feel they have a decent handle on cybersecurity and want to validate their cybersecurity controls.

This package focuses on the 3 attack vectors: external, internal, and people.

Main Objective: Identify and rank order the true cybersecurity risk to your environment with an emphasis on insider threat.

Services Included:
» External Black Box Penetration Testing
» Internal *Gray Box* Penetration Testing
» Phishing Exercise
» Wireless Penetration Test
» Web Application Penetration Testing (Optional)

Price Range: Starts at $12,750

Pricing is based on the following factors: number of external facing systems, number of internal systems, number of users, number of wireless access points, and web application information.
